Tourism Exemplar Papers:

Liminality in Tourism Robert S. Bristow, Ian Jenkins, 2021-09-05 Liminality is not typically associated with tourism even though it can be viewed as an intrinsic element of the social cultural experiences of tourism *Liminality in Tourism Spatial and Temporal Considerations* aims to build upon the tradition of liminality as expounded in social and anthropological disciplines elaborating on the theoretical principles and concepts found within certain aspects of the tourist journey and tourist product The emergence of post modern society has impelled a change in the tourist gaze towards a more experiential and adventuresome globalised experience An important aspect of the tourist phenomenon of liminality is where a transformative experience is triggered by entering a liminoid tourist space leaving the tourist permanently psychologically transformed before returning to normalised society The narrative provides a new perspective on the tourist experience with a provocative examination into the multidimensional aspects of tourism by exploring tourism within the spatial and temporal aspects of liminal landscapes Covid 19 has further changed the rubric of tourism Until the current pandemic tourism has basically been a fun experience In a post pandemic world however the tourist is now facing an unknown future which will almost certainly affect tourism liminality This book presents the reader with a wealth of examples and case studies closely illustrating the association between tourism and liminal experiences The geographical perspectives explore the more subconscious outcomes of destination and tourist product consumption The book should be a useful reader to tourism geography where the theory of liminality can be synthesized into tourist experiences The chapters in this book were originally published as a special issue of the journal *Tourism Geographies* [Advances in Cultural Tourism Research](#) Bart Neuts, João Martins, Marinos

Ioannides, 2024-10-14 This open access book pertains to the International Conference on Cultural Tourism Advances held on June 27 and 28 2023 at KU Leuven Belgium It focuses on advancing understanding of the sustainable development potential of cultural tourism by examining successful policy interventions emerging cultural tourism trends advancements in visitor management systems new business and governance models and the opportunities arising from ICT in the twenty first century This book presents recent key advances and their significant outcomes in the domain of European Cultural Tourism

[Tourism, Tradition and Culture](#) David Harrison, 2020-11-18 David Harrison has contributed to the academic study of tourism over the last 30 years This book brings together a collection of his published material that reflects the role played by tourism in development both in societies emerging from Western colonialism and in societies previously part of the Soviet system The overarching theme looks at how promoted as a tool for development tourism can lead to conflict between competing elites but can also empower groups previously subject to constraint by traditional authorities Tradition is intensely manipulatable and always reflects power relations Such pressure on tradition is but one aspect of tourism's wider social impacts This includes changes in economic and social structure which for many constitute social problems that need to be addressed At the same time sustainability though apparently a worthy aim can be a problematic concept especially when

applied to traditional cultures and may conflict with such ideals as egalitarianism **Stories of Practice: Tourism Policy and Planning** Dianne Dredge, John Jenkins, 2016-04-01 Analyses of contemporary tourism planning and policymaking practice at local to global scales is lacking and there is an urgent need for research that informs theory and practice Illustrated with a set of cohesive theoretically informed international case studies constructed through storytelling this volume expands readers knowledge about how tourism planning and policymaking takes place Challenging traditional notions of tourism planning and policy processes this book also provides critical insights into how theoretical concepts and frameworks are applied in tourism planning and policy making practice at different spatial scales The book engages readers in the intellectual political moral and ethical issues that often surround tourism policymaking and planning highlighting the great value of reflective learning grounded in the social sciences and revealing the complexity of tourism planning and policy
