Art and Gentrification in the Changing Neoliberal Landscape Tijen

Tunali,2021-05-30 Art and Gentrification in the Changing Neoliberal Landscape brings together various disciplinary perspectives and diverse theories on art s dialectical and evolving relationship with urban regeneration processes It engages in the accumulated discussions on art s role in gentrification yet changes the focus to the growing phenomenon of artistic protests and resistance in the gentrified neighborhoods Since the 1980s art and artists role s in gentrification ha ve been at the forefront of urban geography research in the subjects of housing regeneration displacement and new urban planning In these accounts the artists have been noted to contribute at all stages of gentrification from triggering it to eventually being displaced by it themselves The current presence of art in our neoliberal urban space s illustrates the constant negotiation between power and resistance And there is a growing need to recognize art s shifting and conflicting relationship with gentrification The chapters presented here share a common thesis that the aesthetic reconfiguration of the neoliberal city does not only allow uneven and exclusionary urban redevelopment strategies but also facilitates the growth of anti gentrification resistance The book will be of interest to scholars working in art history urban cultures cultural geography and urban studies as well as contemporary art practitioners and policymakers

Making Cultural Cities in Asia June

Wang,Tim Oakes,Yang Yang,2015-12-22 This book examines the vast and largely uncharted world of cultural creative city making in Asia It explores the establishment of policy models and practices against the backdrop of a globalizing world and considers the dynamic relationship between powerful actors and resources that impact Asian cities Making Cultural Cities in Asia approaches this dynamic process through the lens of assemblage how the policy models of cultural creative cities have

been extracted from the flow of ideas and how re-invented versions have been assembled, territorialized and exported. This approach reveals a spectrum between globally circulating ideals on the one hand and the place-based contexts and contingencies on the other. At one end of the spectrum, this book features chapters on policy mobility in particular the political construction of the web of communication and the restructuring or rescaling of the state. At the other end, chapters examine the increasingly fragmented social forces, their changing roles in the process and their negotiations, alignments and resistances. This book will be of interest to researchers and policy makers concerned with cultural and urban studies, creative industries and Asian studies.

The Political Economy of Same-Sex Marriage Bronwyn Winter, 2020-12-29. Same sex marriage is now legal in twenty-nine countries and the subject of continued debate around the world. *The Political Economy of Same Sex Marriage: A Feminist Critique* considers this debate from a political economy perspective. Rather than engaging directly in the now well-rehearsed social movement and academic for and against debates, this book focuses on processes of institutionalization of same sex marriage and so-called rainbow families within neo-liberal capitalist democracies. It examines how states and markets appropriate same sex marriage and family to enhance their own political and symbolic capital, consolidating power and profit within existing systems of gendered and raced socioeconomic stratification. Taking a radical feminist, heterodox, qualitative and intersectional approach, this book investigates the political economy of same sex marriage across three axes: same sex marriage as institution, same sex marriage and the market, and the political economy of the rainbow family. The examination of case studies from different countries and regions enables a comparative analysis that foregrounds cultural, political and economic path dependencies while at the same time highlighting a number of striking commonalities. In all the countries discussed in this book and in most respects, same sex marriage has been integrated almost seamlessly into a mainstream, malestream political economy of marriage and family and its translation into added market and productive value. *The Political Economy of Same Sex Marriage: A Feminist Critique* will be of use to researchers and students alike and indeed to all those who are curious about the mainstreaming of homosexuality within twenty-first century capitalist democracies.

Daily Graphic Kingsley Inkoom, 2014-09-03. *Sustainable Ecotourism in Central America* Andrew P. Miller, 2016-09-30. *Sustainable Ecotourism in Central America: Comparative Advantage in a Globalized World* examines the factors necessary for Nicaragua, Panama and Belize to implement an economic development model based on the growth of ecotourism and foreign direct investment. In order to determine what factors are necessary to implement this model, this book analyzes the state of ecotourism development in Costa Rica and the lessons that the Costa Rican case can provide for other Central American states. It also assesses the effects of globalization and the increasing implementation of free market policies on the development of ecotourism. The book ultimately argues that globalization and neoliberalism have made it more likely that states will be able to adopt a development model based on ecotourism and foreign direct investment due to the manner in which neoliberalism and globalization help to create ever-increasing economic interconnectedness and openness. While

globalization has served to shrink the world and make it easier for people to travel the economic openness of neoliberalism has facilitated global flows of both tourists and international capital into every corner of the world Understanding the way globalization and neoliberalism interact with ecotourism development and foreign direct investment is the key to formulating policy recommendations for states in Central America to jumpstart their economic development

The Spatial and Economic Transformation of Mountain Regions Manfred Perlik, 2019-01-03 Mountain regions are subject to a unique set of economic pressures they act as collective enterprises which have to valorize rare resources such as spectacular landscapes While primarily rural in nature they often border large cities and the development of industries such as hydroelectric power and the rapid development of tourism can bring about sweeping socio economic change and vast demographic alterations The Spatial and Economic Transformation of Mountain Regions describes the socio economic changes and spatial impacts of the last four decades with the transformation of mountain areas held up as an example Much of the real world context draws on the Alps spanning as they do the significant economies of France Italy Germany Switzerland and Austria Chapters address academic discourse on regional development in these mountain areas and suggest alternative approaches to the liberal productivist societal model This book will be essential reading for professionals institutions and NGOs searching for counter models to the existing marketing approaches for peripheral areas It will also be of interest to students of regional development economic geography environmental studies and industrial economics
