

SPECIAL WEAPONS DALEKS

The Special Weapons Dalek is the ultimate artillery. The battle armour has no manipulator arm or eyestalk, supporting instead a pulse cannon. The power of its weapon destroys all targets at an atomic level - even other Daleks. This model was deployed in the last Great Time War, and is now part of the new generation of Paradigm-born Daleks.

The creature within is bred for only one purpose - extermination!

Weapons Training Unit,1998 The

World's Elite Forces John Walter, 2002 This book presents an illustrated guide not just to the guns of the world's special forces but also an introduction to their development. Considerable thought has been given in the last few years as to how existing weapons can be adapted to the highly specialized situations required of them today. Particular attention has been given to sniping equipment and a wide range of technology is now in use not only with military special forces but also with police and SWAT units where the demands of service are rarely as vigorous as armed combat. John Walter reveals the development of highly sophisticated sight and observation tools employing lasers and range finders which allow an operative to pinpoint a target up to 500 metres away even at night. He also charts the parallel advances of body armor and grenades just as the use of kevlar and composites has improved personal safety so the advent of smoke, stun and controlled fragmentation grenades has improved the ability of the individual soldier to take the offensive in counter terrorist operations.
