Community in Sociolinguistic Panel Research Isabelle Buchstaller, Karen V. Beaman, 2025-10-31 This collection engages with key questions in panel study research by exploring more deeply the interrelationship between the individual and the community and the impact on language change across the lifespan The book is organized around four broad themes each followed by a forward looking commentary that ties together the key findings from the individual chapters The first section examines style and socio indexicality with the goal of disentangling short term style shifting from long term language change The second section continues with a focus on style examining audience design and socially meaningful variation in professional settings as an integral component of age and role appropriate behavior The third section considers different language dialect contact scenarios and the impact on changing social identities and behavioural norms which can fluctuate across the lifespan for different settings and life stages and for different types of variables The final section explores a computational agent based model of lifespan and community change targeting the practical challenges often encountered in panel research such as data sparsity and the short duration of the human lifespan A postscript underscores the importance of considering style and setting as integral aspects of panel research rather than as afterthoughts and of leveraging computational modeling to expand our understanding of the interdependencies between lifespan and community change This book will appeal to scholars interested in language variation and change sociolinguistics historical linguistics and computational linguistics

New Directions In Language Development And Disorders Michael Perkins, Sara Howard, 2012-12-06 Research into child language development is being conducted more extensively by more people and in more countries throughout the world than at any point in the past We now know more than we ever did before about the linguistic cognitive neurobio logical and social capacities that children bring to their language learning task as well as the ways in which these capacities interact with a whole range of factors present in the child s environment throughout the learning process not least the particular characteristics of the language or languages to which the child is exposed Far from inducing a sense of complacency this new knowledge seems instead to create an even stronger impetus to know more This is

partly because of the new and unforeseen questions it raises and partly because of competition between different theories to provide the best explanation of the phenomenon and which in turn engender different methods of enquiry This volume addresses many of the key issues which are currently exercising the minds of child language researchers and which are likely to motivate research for some years to come The chapters included here all previously unpublished present a great deal of new data and address a range of theoretical issues from a variety of perspectives *Resources in Education* ,1994 The Handbook of Rhetoric and Public Address Shawn J.
