Spectra Precision Laser LL400 Laser Level

A New Standard in Rugged Construction and Precise Accuracy

Durable, highly accurate laser level withstands the toughest job site

The fully automatic, self-leveling Spectra Precision® Laser LL400 sets a new standard in rugged reliability, handling a wide variety of general and concrete construction applications. Even in tough job site conditions, the LL400 consistently delivers reliable, accurate performance to increase your overall productivity and cost-savings.

The LL400 Laser Level features easy, one-button operation for basic leveling and provides reliable, highly accurate, long-range measurements, even for machine control applications.

The LL400 is designed to be durable and reliable, day in and day out, and features superior drop and weather protection. The rugged LL400 can withstand drops of up to 1 meter (three feet) onto concrete and tipped tip-over up to 1.5 meters (five feet). This strength, combined with full weatherproofing and dust-proofing, results in reduced downtime and lower repair costs.

The LL400's self-leveling capability and optional RC601 remote control provide outstanding accuracy and ease of use. Since the LL400 levels itself when turned on, setting up is easy with fewer controls to deal with. The LL400 also features a single-axis slope mode to allow slopes on grade, while maintaining accuracy. Grade matching can also be performed by one person using the optional RC601 remote control.

Choice of Receiver

You can customize the LL400 to your specific application needs with a choice of the HL700 or CR600 receivers.

HL700 Laserometer

The Spectra Precision Laser HL700 Laserometer uses new technology to measure and display beam location and is ideal for use with the LL400 transmitter. The HL700 features a digital readout of elevation that shows exactly how far you are from on-grade allowing quick elevation checks without moving the rod clamp. An anti-strobe sensor stops construction lights from setting off the receiver, and makes it easier to identify true laser beam signals. The protective over molded housing withstands a drop of 3 m (10 ft) onto concrete. The highly visible LED display and dual sided LCD's allow you to work anywhere.

CR600 Receiver

Rugged, accurate and easy to use, the Spectra Precision Laser CR600 Receiver is ideal for longer range leveling and basic machine control applications. In addition to use as a handheld and rod-mounted unit, the CR600 can be mounted on a backhoe, small excavator or skid steer for machine control with 370-degree reception. It provides highly visible high, low or on-grade information.
