

**SPECTRUM C 202** is the newest member of Spectronics family spectrophotometers. It offers modern design and simplified use.

- 1 - Sample Compartment
- 2 - Display
- 3 - Control

### Switching On Power and Initialization

Slide the ON/OFF power switch (located on the back, joined to the mounting for the spectrophotometer). The instrument performs a series of self-tests and starts up.

Immediately after the instrument is switched ON, a rapid sequence display will indicate initialization (the display will not be in the normal position).

Following the rapid sequence the first normal self-performed test under the normal test conditions will check the sample compartment.

The self-performed tests will display on the screen.

If any abnormality occurs during self-testing, an appropriate error message is displayed with prompts for correction of the fault.

After initialization is completed, the main screen is displayed and the system is ready for operation.
