

SPEED MATHEMATICS SIMPLIFIED

Among the simplifications made possible by this system are:

✓ You forget the addition table ever last — and add the largest column of numbers without ever going over ten.

✓ You never subtract a larger digit from a smaller one — and never borrow.

✓ You multiply without carrying.

✓ You divide with half the pencil work of long division — and never divide by more than a single digit.

✓ You perform every operation from left to right, which is not only man's natural (it is the way you read the numbers) but also makes every process self-estimating. For an approximate answer, you just do the first step or two and stop.

In addition to the streamlined systems, the book also includes two other special features:

✓ The two fastest techniques for checking answers are fully explained, and themselves streamlined for faster use.

✓ The most valuable classic short-cuts are explained in relation to each other, with many examples, so that you can quickly select the best method for solving any problem.
