from getting into the powder. Next, set the powder dispensing adjustment for the correct powder charge. This will probably require a few minor adjustments, plus or minus, until the exact charge is obtained. It is very easy to do using the powder scale to weigh the charges dispensed. Once the correct setting is obtained, read the setting on the measure and record it in a reloading notebook for future reference. Charge all the resized and primed cases. Visually check each case to be sure that none have been double charged or under charged with powder. You are now ready to seat the bullet in the cartridge case. Do not leave powder in the measure for
