Beeline Shalini Shankar, 2019-04-30 An anthropologist uses spelling bees as a lens to examine the unique and diverse traits of Generation Z and why they are destined for success At first glance Generation Z youth born after 1997 seems to be made up of anxious overachievers hounded by Tiger Moms and constantly tracked on social media One would think that competitors in the National Spelling Bee the most popular brain sport in America would be

the worst off Counterintuitively anthropologist Shalini Shankar argues that far from being simply overstressed and overscheduled Gen Z spelling bee competitors are learning crucial twenty first century skills from their high powered lives displaying a sophisticated understanding of self promotion self direction and social mobility Drawing on original ethnographic research including interviews with participants judges and parents Shankar examines the outsize impact of immigrant parents and explains why Gen Z kids are on a path to success *Reading for Our Lives* Maya Payne Smart,2025-04-29 Completely revised and updated Now in paperback An award winning journalist and literacy advocate provides a clear step by step guide to helping your child thrive as a reader and a learner Today s children face intense pressure to meet rising academic standards and prepare for future careers but most fall dangerously short Early struggles with language and literacy often snowball into lasting disadvantages Millions of U S kids don t learn to read well in elementary school driving low adult literacy rates and threatening the nation s economic productivity public health and social equity In *Reading for Our Lives* journalist Maya Payne Smart shows that the literacy crisis starts at home Too many parents expect schools to unlock their child s reading potential unaware that even the best classroom instruction which most don t get can t make up for weak early preparation or inconsistent support outside of school Smart breaks down the latest research to show parents how to do their part to build essential literacy skills She busts the myth that bedtime stories are parents greatest contribution to kids reading development She advocates instead for weaving a range of simple fun free literacy habits and activities into everyday family life and shows you how to do it With optimism and evidence *Reading for Our Lives* delivers a clear call to action and a path forward for families schools and communities to beat the literacy crisis together

Whatever Happened to the Metric System? John Bemelmans Marciano, 2014-08-05 The intriguing tale of why the United States has never adopted the metric system and what that says about us The American standard system of measurement is a unique and odd thing to behold with its esoteric inconsistent standards twelve inches in a foot three feet in a yard sixteen ounces in a pound one hundred pennies to the dollar For something as elemental as counting and estimating

the world around us it seems like a confusing tool to use So how did we end up with it Most of the rest of the world is on the metric system and for a time in the 1970s America appeared ready to make the switch Yet it never happened and the reasons for that get to the root of who we think we are just as the measurements are woven into the ways we think John Marciano chronicles the origins of measurement systems the kaleidoscopic array of standards throughout Europe and the thirteen American colonies the combination of intellect and circumstance that resulted in the metric system s creation in France in the wake of the French Revolution and America s stubborn adherence to the hybrid United States Customary System ever since As much as it is a tale of quarters and tenths it is a human drama replete with great inventors visionary presidents obsessive activists and science loving technocrats Anyone who reads this inquisitive engaging story will never read Robert Frost s line miles to go before I sleep or eat a foot long sub again without wondering Whatever happened to the metric system
