Varghese,Ashok Agarwal,2024-07-15 Cryopreservation of oocytes sperm and ovarian and testicular tissues as well as embryos is one of the most critical procedures to preserve the reproductive capacity of individuals It is an indispensable part of assisted reproductive technologies as nearly all IVF clinics around the world have embraced the freeze all embryo strategy with no fresh embryo transfers Advanced platforms such as automation and artificial intelligence are making their way into all aspects of assisted reproductive technologies including reproductive tissue banking process and storage At the same time lax regulations and lack of training combined with rapid demands of IVF services have resulted in a climate of frequent disaster and catastrophic incidents from the cryo labs that store thousands of patients embryos for years With the onset of malpractice lawsuits against the clinics and awards of large compensation to the patients regulations are

getting stricter in this arena to safeguard the integrity of storage systems and industry leaders are developing advanced devices and alarm systems to remotely monitor storage systems exploring the power of internet AI and automation Therefore there is an urgent need for a comprehensive text in this field based on the introduction of such a wide array of advanced devices newer technologies regulatory frameworks risks and disaster management options With contributions from top internationally recognized scientists and clinicians with expertise in cryopreservation and reproductive technology this book provides a comprehensive overview of the basics of cryobiological processes and a technically detailed presentation on all aspects of cryopreservation of reproductive cells and tissues It presents the current well established procedures as well as novel techniques with the latest innovations described in detail Bringing together the latest information with key thought leaders in the field Cryopreservation in Assisted Reproduction is intended to be the go to resource for all reproductive medicine clinicians embryologists lab technologists IVF lab directors managers and researchers **Fertility**

Preservation of Human Oocytes Andrea Borini, Giovanni Coticchio, 2009-08-27 Oocyte cryopreservation entails important potential advantages for human IVF offering a less ethically disputable alternative to embryo cryopreservation simplifying and making safer oocyte donation and giving an opportunity for fertility preservation to women at risk of premature ovarian failure as an effect of genetic factors or chemo or radiotherapies Oocyte cryopreservation could also meet the expectations of women wishing to preserve their fertility for social reasons In the last few years advances in cryopreservation methodologies have dramatically improved the efficiency of oocyte cryopreservation leading to the birth of over a thousand babies and challenging the supremacy of embryo cryopreservation as the preferred form of fertility preservation This text has been conceived with the aim of offering a comprehensive view of the state of the art of oocyte cryopreservation It covers

fundamental concepts of low temperature storage controlled rate slow cooling and vitrification aspects of oocyte physiology relevant to the process of cryopreservation essential biological and clinical evidence and ethical implications of oocyte cryopreservation thereby providing a complete overview of progress in this strategy in assisted reproduction **Principles**
