INTRODUCTION

This worksheet complements the Click & Learn "Virus Explorer" developed in conjunction with the 2016 documentary, *Spillover: Zika, Ebola & Beyond* (<http://www.hhmi.org/biointeractive/virus-explorer>).

PROCEDURE

Follow the instructions as you proceed through the Click and Learn, and answer the questions in the spaces provided.

1. Let's review. Click on the "About" tab at the bottom. Read the information and list four (4) ways in which viruses can differ from each other.

- 1 - the structure of the virus
- 2 - genome type
- 3 - host type
- 4 - transmission mechanism

2. This interactive uses several abbreviations. Fill in what each abbreviation stands for in the table below:

Abbreviation	Description
nm	nanometer
bp	base pairs
ss	single-stranded
ds	double-stranded

3. Close the "About" window, and locate the  next to each viral characteristic tab across the top. Click on these icons and answer the questions below associated with each viral characteristic.

- a. **Envelope:** Not all viruses have an envelope. If a virus has this outer layer, explain how it forms.

This outer layer is formed when viruses exit their host cell by budding the cell's surface or other membranes. In the process, part of the host cell membrane envelopes the virus, forming an outer layer which is called the envelope. It contains viral proteins embedded in it, which have proteins attached to them that are called glycoproteins. They help bind receptors on the membrane of a host cell.
