

The Adventurer

edges and large expanses of polished alloy. Inside those restyled oses, the motor was retuned even more than the Tiger's to give 70 PS for a very user friendly dose of low-down punch and mid-range power – maximum torque is at just 4800 rpm as opposed to the 900 Trident's 6500 rpm. The cycle parts were given an equally radical redesign, although the retro style stopped short of giving the Thunderbird twin rear shock absorbers. But everything else, the shape of the tank, the chrome headlight and countless other details, harks back to the original Thunderbird and nothing does so as shamelessly as the 'mouth-organ' tank badge, a classic loon if ever there was one.

But the Thunderbird was more than just another new model, it was the start of a whole

new marketing game. With one eye on Harley-Davidson's success, Triumph designed a range of bolt-on accessories for the Thunderbird and a family of Thunderbird derivatives. The first bolt-on goodies offered extra chrome, leather panniers, a windshield, and two-tone front mudguards for the bike, with boots, leathers, jackets and helmet options for the rider. Sounds familiar? It looks very like the formula that Harley-Davidson used to such effect in their comeback from the commercial grave.

The first Thunderbird derivative, the Adventurer, appeared for 1996 with a different rear subframe and rear-end styling including a sissy bar and single seat. Frankly, it looked like a naff '70s custom Harley and sold like one. That same year, the short-stroke 750 cc motor bowed out of the range, but it went with

a bang not a whimper not in a final batch of Tridents but in a limited-edition (limited to the number of spaces they had on the shelves) run of 750 Speed Triples. Another very clever piece of marketing, as was putting the original, bigger Speed Triple's motor in the Sprint and calling it the Sprint Sport. The 750 Speed Triple only stayed in the range for one year, 1996, while the Sprint Sport hung on for an extra two years. The reason for using up all those motors was the advent of the new range of fuel-injected and heavily revised three-cylinder engines that first powered the T509 Speed Triple and T595 Daytona of 1997.

Not that development of the carburetted bikes was neglected. Triumph got a Thunderbird derivative right in '96 with the Thunderbird Sport. If there was a criticism of the original T-bird it was that it was a trifle soft and underbraked. That was cured with the Speed Triple's forks and twin front disc brakes, 17-inch wheels front and rear, and the styling was cleverly reminiscent of the old Hurricane version of the first Triumph triples. The Legend TT is the same bike with a different exhaust system and graphics. For the rider who didn't want the hard-edge of the Daytonas or the custom style of the Thunderbird it was the perfect compromise and looked as good as the Adventurer looked wrong.

The long-serving Trophy 900 and 1200 models weren't neglected. In 1996 they received total restyles complete with fox-eye headlights, a new fairing and integrated panniers. The carburetors were changed on the 900 and the gearing lengthened on the 1200 to try and get better fuel consumption. The Trophy models were still big, heavy bikes but the new bodywork vastly improved the way in which they performed their chosen task.

From '97 on, the cutting-edge sports bikes in the range were all using the new fuel-injected motor but Triumph had one last hunch with their biggest carburetted engine. The company had never tried to build four-cylinder engines to compete with the Japanese race-replicas despite the 147 PS Daytona 1200 of 1992, instead concentrating on developing the three-cylinder bikes that are Triumph's hallmark. Nevertheless, in 1999 the final batch of 250 1200 Daytonas were released as the 1200SE (for Special Edition). In yet another clever little marketing ploy, the SE got six-piston calipers, a pillion seat cover and black paintwork with gold detailing. There is also a little numbered plaque telling which of the 250 examples it is. The colour scheme manages to make the Daytona look a lot older than it is. It's yet another example of how Triumph use a comparatively limited kit of parts to produce the maximum number of models but manage to make them all not just distinctive but different to ride as well.

25 x 10 75 inches This publication is a reproduction of the Triumph factory workshop manual part number 99 0963 0887  
4223 The original 1969 Trident workshop manual 99 0887 was updated in 1972 under part number 99 0963 A short time  
later the introduction of a 5 speed gearbox 1972 and a front wheel disc brake 1973 necessitated the publication of a  
supplement 00 4223 which was then incorporated into the 99 0963 manual creating a single workshop manual for the 1968  
through 1974 models Unfortunately the 99 0963 manual was also published without the 00 4223 supplement and the manual  
that includes the supplement can only be identified by the following notation printed to the bottom corner of the title page  
PART NO 99 0963 INCORPORATING 99 0887 AND SUPPLEMENT 00 4223 The difference in content between the two  
manuals that carry the same part number is extremely important to owners of the 5 speed and disc brake models There were  
a number of running changes made throughout the 6 year production run of these models and in order to provide information  
applicable to those changes the 00 4223 supplement was either merged or appended to the end of the appropriate sections  
within the manual However it is also important to note with regard to any maintenance and repair instructions and also the  
specifications in the General Data GD section that whenever engine numbers are stated the data will be specific to that

particular series Therefore the reader is encouraged to pay close attention to any engine number notations and to read the entire section plus the supplemental data prior to commencing any work In conclusion 750cc T150 and T150V owners are subjected to considerable confusion surrounding the appropriate selection of the multitude of originals and reprints of the various 750cc Trident manuals that have recently flooded the marketplace However the combination manual 99 0963 99 0887 00 4223 is the most comprehensive manual for the entire line of 750cc Trident three cylinder motorcycles produced from 1968 through 1974 however it is somewhat scarce and difficult to find In addition many of the changes made during the production run necessitate the use of this combination manual and we are pleased to offer this reprint of the 99 0843 99 0948 00 4223 manual as a service to all 750cc T150 T150V owners In addition as the X75 Hurricane is a combination of both the Trident and the BSA Rocket 3 this manual will also be of interest to owners of that model The models covered are 1968 to 1970 T150 Trident 1971 to 1972 T150 Trident 1972 to 1974 T150V Trident with 5 speed gearbox and disc front brake
