Are you a member of ACCA? Go to the ACCA website to find out about special offers on The ESC Textbook of Intensive and Acute Cardiovascular Care and to buy your copy today.

The ESC Textbook of Intensive and Acute Cardiovascular Care is the official textbook of the Acute Cardiovascular Care Association (ACCA) of the ESC. This new updated edition continues to comprehensively approach all the different issues relating to intensive and acute cardiovascular care. The textbook is addressed to all those involved in intensive and acute cardiac care, from cardiologists to emergency physicians and healthcare professionals. The chapters cover the various acute cardiovascular diseases that need high-quality intensive treatment but also organisational issues, cooperation among professionals, and interaction with other specialities in medicine. The largest section of the textbook is devoted to non-cardiac disease which could acutely involve the cardiovascular system. Other noteworthy chapters are on ethical issues which are so important in acute cardiac care, such as patient safety, donor organ management, and palliative care. A unique characteristic of the textbook is the presence of a whole section devoted to biomarkers which underline the growing importance of laboratory medicine in the field of intensive and acute cardiac care. A particular asset of the textbook is the digital version available on Oxford Medicine Online, which has additional online features including an extra chapter on lung ultrasound and many more images and videos as well as a full list of references from all chapters. The online version is updated by the same authors on a yearly basis and is available with the print version and separately on a subscription basis, allowing easy access to content in digital and mobile-optimised format. The textbook aligns directly with the core training curriculum for ACCA. This print edition of The ESC Textbook of Intensive and Acute Cardiovascular Care comes with access to the online version on Oxford Medicine Online for as long as the edition is published by Oxford University Press. By activating your unique access code, you can read and annotate the full text online, follow links from the references to primary research materials, and view, enlarge, and download all the figures and tables.

Encyclopedia of the Novel Paul Schellinger, 2014-04-08. The Encyclopedia of the Novel is the first reference book that focuses on the development of the novel throughout the world. Entries on individual writers assess the place of that writer within the development of the novel form, explaining why and in exactly what ways that writer is important. Similarly, an entry on an individual novel discusses the importance of that novel, not only from analyzing the particular innovations that novel has introduced and the ways in which it has influenced the subsequent course of the genre. A wide range of topic entries explore the history, criticism, theory, production, dissemination, and reception of the novel. A very important component of the Encyclopedia of the Novel is its long

Stauffer,1993-07 *Rapid ABG Interpretation*

Desmond Allen, 2014-11-26 Desmond Allen has been a credentialed respiratory therapist since 1975. He has managed or been the clinical coordinator of four cardiopulmonary departments and the clinical preceptor for numerous students. He holds a PhD in education and another in health administration. The rapid interpretation of ABGs need not be the ominous task that it is for so many. Herein clinicians will learn to interpret ABGs rapidly by answering three simple questions: Is the pH normal, acidotic, or alkalotic? Is the pH correctly predicted by the PaCO_2 ? If the pH is abnormal, is the abnormality caused, compensated, or exacerbated by the PaCO_2 ? By answering these simple questions, we have all the information we need for an accurate interpretation, whether the ABG is normal, respiratory or metabolic acidosis or alkalosis, or both acute, compensated, or partially compensated. The second section covers the fundamentals of BiPAP and mechanical ventilation management. These guidelines are presented so as to be employed in real time by physicians and respiratory therapists or to be converted into policies and procedures.
