Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. Suppose you want to design and build a house. How would you communicate your design plans with the construction crew that would work on the house?

I would show them what my thinking is and see how we could make it happen.

2. Cells build large, complicated molecules such as proteins. What do you think cells use as their "design plans" for proteins?

I would think that cells use DNA as their "design plans" and result with protein.

Gizmo Warm-up

Just as a construction crew uses blueprints to build a house, a cell uses DNA as plans for building proteins. In addition to DNA, another nucleic acid, called **RNA**, is involved in making proteins. In the *RNA and Protein Synthesis* Gizmo, you will use both DNA and RNA to construct a protein out of **amino acids**.

1. DNA is composed of the **nitrogenous bases** adenine (A), cytosine (C), guanine (G), and thymine (T). RNA is composed of adenine, cytosine, guanine, and uracil (U).

Look at the SIMULATION pane. Is the displayed segment a part of a DNA or RNA molecule? How do you know?

It is a part of the DNA because it's a double helix.

2. **RNA polymerase** is a type of enzyme. Enzymes help chemical processes occur quickly. Drag the yellow RNA polymerase molecule onto the DNA strand. Describe what happens.

The enzyme splits the DNA into two separated strands.

11th Hour Deanna Raineri, 2009-05-11 The 11th Hour Series is designed to be used when a textbook doesn't make sense when the course content is tough or when you just want a better grade in the course. The authors cut through the fluff to get to what you need to know and then help you understand it. Clinical correlations or everyday applications include examples from the real world to help students understand key concepts more readily. Dedicated web page there 24 hours a day will give extra help, tips, warnings of trouble spots, extra visuals, and more. A quick check on what background students will need to apply helps equip them to conquer a topic. The most important information is highlighted and explained, showing the big picture and eliminating the guesswork. After every topic and every chapter, lots of opportunity for drill is provided in every format: multiple choice, true/false, short answer, essay. An easy trouble spot identifier demonstrates which areas need to be reinforced and where to find information on them. You can change the sequence of the semesters per the needs or interests of your student. Materials for each semester are independent of one another to allow flexibility. Semester 1: Intro to Science. Have you ever wondered about human fossils, cave men, skin color, ape men, or why missing links are still missing? Want to discover when T-Rex was small enough to fit in your hand? Or how old dinosaur fossils are and how we know the age of these bones? Learn how the Bible's world view not only unites evidence from science and history into a solid creation foundation for understanding the origin, history, and destiny of life including yours. In *Building Blocks in Science*, Gary Parker explores some of the most interesting areas of science: fossils, the errors of evolution, the evidences for creation, all about early man and human origins, dinosaurs, and even races. Learn how scientists use evidence in the present, how historians use evidence of the past, and discover the biblical world view not only evolution, but that puts the two together in a credible and scientifically sound way. Semester 2: Life Science. Study clear biological answers for how science and Scripture fit together to honor the Creator. Have you ever wondered about such captivating topics as genetics, the role of natural selection, embryonic development, or DNA and the magnificent origins of life? Within *Building Blocks in Life Science*, you will discover exceptional insights and clarity to patterns of order in living things, including the promise of healing and new birth in Christ. Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years. The evolutionary worldview can be found, filtered through every topic, at every age level in our society. It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions. This dynamic education resource helps young people not only learn science from a biblical perspective but also helps them know how to defend their faith in
