realization of digital systems and its use for analog circuits opens new possibilities for the design of complex mixed analog digital VLSI very large scale integration chips. Although we are focusing attention in this book principally on circuits and systems which can be implemented in CMOS technology, many considerations and structures are of a general nature and can be adapted to other promising and emerging technologies, namely GaAs Gallium Arsenide and BiMOS bipolar MOS i.e. circuits which combine both bipolar and CMOS devices technology. Moreover, some of the structures and circuits described in this book can also be useful without integration. In this book, we describe two large classes of analog integrated circuits: switched capacitor SC networks and continuous time CMOS unswitched circuits. SC networks are sampled data systems in which electric charges are transferred from one point to another at regular discrete intervals of time, and thus the signal samples are stored and processed. Other circuits belonging to this class of sampled data systems are charge transfer devices CTD and charge coupled devices CCD. In contrast to SC circuits, continuous time CMOS circuits operate continuously in time. They can be considered as subcircuits or building blocks, e.g. U.S. Government Research & Development Reports, 1966-11 *EE Systems Engineering Today*, 1969 Fundamentals of Microprocessors & its Application A.K.Chhabra, 2005. World's first Microprocessor INTEL 4004, a 4-bit Microprocessor, came in 1971, forming the series of first generation microprocessors. Science, then, with more advancement in technology, there have been five generations of microprocessors. However, the 8085, an 8-bit Microprocessor, is still the most popular Microprocessor. The present book provides a simple explanation about the Microprocessor, its programming, and interfacing. The book contains the description mainly of the 8-bit programmable Interrupt Interval Timer Counter 8253, Programmable Communication Interface 8251, USART 8251A, and INTEL 8212, 8155, 8256, 8755, and 8279.
