MacDougall,2011-11-21 The shift from orality to literacy that began with the invention of the phonetic alphabet and which went into high gear with Gutenberg's printing press more than 500 years ago helped make the modern world Some commentators have argued that this shift from orality to literacy marked a much broader cultural shift of cataclysmic proportions Today with everything from e-mail to blogs iPods and podcasts through Google Yahoo eBay and with cutting edge smart phones we find ourselves developing relationships with these newest communication tools that aren't simply allowing us to communicate faster farther and with more ease than ever before We aren't just moving around ideas data and information at unimaginable speed and scale Our interminglings and fusions with digital communication technologies are also altering both individual and group consciousness in fundamental ways how we form and sustain relationships how we think and perceive what it means to see and to feel We are remaking human identity once more and manufacturing a new kind of culture along the way The processes bound up in our digination may well be consequential to

the trajectory of human evolution That time honored trope the notion that technology is not the problem rather it s how people use technology that s the problem is shown to be wanting Highlighting Marshall McLuhan s tetrads or laws of media as a primary tool of analysis R C MacDougall argues in line with other media ecologists that it s not so much how we use certain tools that matters it s that we use them More than any other technological form perhaps communication technologies play particularly powerful and systemic roles in our culture or any culture for that matter Late adopters and even abstainers are not exempt from the psychological social and cultural effects and side effects of modern digital communication technology While there are certainly varying degrees of immersion that is to say while some of us live in the high rise downtown district some at the city limits and still others out in the proverbial woods we all live in Digination today

Popular Science ,1997-01 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better Official Gazette of the United States Patent and Trademark Office ,2000 *Official Gazette of the United States Patent and Trademark Office* United States.
