Introduction to Management Accounting Kumen H. Jones, 2000. This introduction to accounting and its significant role in making sound business decisions trains readers in becoming wise users, not necessarily preparers, of accounting information. A strong user-based approach that is endorsed and supported by the AECC. The authors present accounting information in a broader business context, emphasizing what accounting information is, why it is important, and how it is used to make strategic economic decisions, but still include traditional debit-credit information as optional coverage. Discussions include: Management Accounting: Its Environment and Future; Classifying Costs; Determining Costs of Products; Cost Behavior; Business Decisions Using Cost Behavior; Making Decisions Using Relevant Information; The Capital Budget; Evaluating Capital Expenditures; The Operating Budget; Standard Costing and Evaluating Performance. For practicing office professionals, accounting clerks, and paraprofessionals and staff accountants. Publisher's description. **Introduction to Management Accounting** Peter R.
