capability to significantly simplify Spring configuration using sensible opinionated defaults But Spring Boot is not the target of the exam therefore all the features are also covered with plain Spring configuration examples How to use Spring to create concurrent applications and schedule tasks How to do remoting to implement client server applications How to work with Spring Web services to create loosely coupled Web services and clients How to use Spring MVC to create RESTful web services and clients How to integrate JMS for asynchronous messaging based communication How to use local JMS transactions with Spring How to configure global JTA transactions with Spring How to use Spring Integration to create event driven pipes and filters architectures and integrate with external applications How to use Spring Batch for managed scalable batch processing that is based on both custom and built in processing components
