Marriott, 2024-09-04 We are living in the Golden Age of Data Visualization The COVID 19 pandemic has demonstrated how we increasingly use data visualizations to make sense of the world Business analysts fill their presentations with charts journalists use infographics to engage their readers we rely on the dials and gauges on our household appliances and we use mapping apps on our smartphones to find our way This book explains how and why this has happened It details the evolution of information graphics the kinds of graphics at the core of data visualization maps diagrams charts scientific and medical images from prehistory to the present day It explains how the cultural context production and presentation technologies and data availability have shaped the history of data visualization It considers the perceptual and cognitive reasons why data visualization is so effective and explores the little known world of tactile graphics raised line drawings used by people who are blind The book also investigates the way visualization has shaped our modern world The European Renaissance and the Scientific Revolution relied on maps and technical and scientific drawings and graphics influence how we think about abstract concepts like time and social connection This book is written for data visualization researchers and professionals and anyone interested in data visualization and the way we use graphics to understand and think about the world [Visual Approaches to Cognitive Education With Technology Integration](#) Ursyn, Anna, 2018-01-05 Within the growing world of social media and computer technology it is important to facilitate collaborative knowledge building through the utilization of visual literacy decision making abstract thinking and creativity in the application of scientific teaching *Visual Approaches to Cognitive Education With Technology Integration* is a critical scholarly resource that presents discussions on cognitive

Management and Visualisation Gordon Fletcher, 2022-12-27 As organisations of all sizes become increasingly digitalised a core management challenge remains unresolved The ability to successfully and sustainably connect the stated vision of an organisation with its strategic plans and in turn with the reported reality of day to day operations is largely an elusive ambition despite the many stated advantages provided by contemporary technologies In this book the case is made for visual management as a method of communications planning learning and reporting that connects the organisation in a single meaningful and seamless way Throughout this book visual management is theorised around the position that all forms of management documentation are an artefact of human construction and of the organisation itself that reflect learned patterns of activity The book places visual management as a more intuitive and seamless method of coordinating learning and communicating across an organisation than more traditional formats of presenting management documents Consciously assembling the artefacts of an organisation in order to manage it introduces a layer of criticality that encourages reflection and consistency that is often absent from current management practice The benefits that a visual approach brings to organisational management are an increasing necessity as machine learning robotics and process automation remove traditional roles from organisations and necessitate new views on how individuals now fit into a data informed business The book contributes to the academic debate regarding resource based and knowledge based views of the organisation by advocating a different more holistic viewpoint and will thus appeal to academics and researchers in this area It would also benefit students across business disciplines whilst the practical models and tools offered will benefit directors and managers looking to implement their own visual

Brooks, Eva Brooks, Cristina Sylla, 2019-01-30 This book constitutes the refereed post conference proceedings of two conferences The 7th EAI International Conference on ArtsIT Interactivity and Game Creation ArtsIT 2018 and the 3rd EAI International Conference on Design Learning and Innovation DLI 2018 Both conferences were held in Braga Portugal and took place October 24-26 2018 The 51 revised full papers presented were carefully selected from 106 submissions ArtsIT Interactivity and Game Creation is meant to be a place where people in arts with a keen interest in modern IT technologies meet with people in IT having strong ties to art in their works The event also reflects the advances seen in the open related topics Interactivity Interaction Design Virtual Reality Augmented Reality Robotics and Game Creation Gamification Leisure Gaming GamePlay ArtsIT has been successfully co located with DLI as the design learning and innovation frame the world of IT opening doors into an increasingly playful worlds So the DLI conference is driven by the belief that tools techniques and environments can spark and nurture a passion for learning transformation domains such as education rehabilitation therapy work places and cultural institutions **Birth of Modern Facts** James W. Cortada, 2023-01-09 For over twenty years James W Cortada has pioneered research into how information shapes society In this book he tells the story of how information evolved since the mid nineteenth century Cortada argues that information increased in quantity became more specialized by discipline e g mathematics science political science and more organized Information increased in volume due to a series of innovations such as the electrification of communications and the development of computers but also due to the organization of facts and knowledge by discipline making it easier to manage and access He looks at what major disciplines have done to shape the nature of modern information devoting chapters to the most obvious ones Cortada argues that understanding how some features of information evolved is useful for those who work in subjects that deal with their very construct and application such as computer scientists and those exploring social media and most recently history The Birth of Modern Facts builds on Cortada's prior books examining how information became a central feature of modern society most notably as a sequel to All the Facts A History of Information in the United States since 1870 OUP 2016 and Building Blocks of Society History Information Ecosystems and Infrastructures R L 2021 **Agent-Based Modeling of Environmental Conflict and Cooperation** Todd Ben-Dor, Jürgen Scheffran, 2018-10-12 Conflict is a major facet of many environmental challenges of our time However growing conflict complexity makes it more difficult to identify win-win strategies for sustainable conflict resolution Innovative methods are needed to help predict understand and resolve conflicts in cooperative ways Agent Based Modeling of Environmental Conflict and Cooperation examines computer modeling techniques as an important set of tools for assessing environmental and resource based conflicts and ultimately for finding pathways to conflict resolution and cooperation This book has two major goals First it argues that complexity science can be a unifying framework for professions engaged in conflict studies and resolution including anthropology law management peace studies urban planning

and geography Second this book presents an innovative framework for approaching conflicts as complex adaptive systems by using many forms of environmental analysis including system dynamics modeling agent based modeling evolutionary game theory viability theory and network analysis Known as VIABLE Values and Investments from Agent Based interaction and Learning in Environmental systems this framework allows users to model advanced facets of conflicts including institution building coalition formation adaptive learning and the potential for future conflict and conflict resolution based on the long term viability of the actors strategies Written for scholars students practitioners and policy makers alike this book offers readers an extensive introduction to environmental conflict research and resolution techniques As the result of decades of research the text presents a strong argument for conflict modeling and reviews the most popular and advanced techniques including system dynamics modeling agent based modeling and participatory modeling methods This indispensable guide uses NetLogo a widely used and free modeling software package to implement the VIABLE modeling approach in three case study applications around the world Readers are invited to explore adapt modify and expand these models to conflicts they hope to better understand and resolve

Diversity of relevant subjects covered **Measuring Gender Equality** Enrico di Bella, Sandra Fachelli, Pedro
López-Roldán, Christian Suter, 2023-12-30 In this open access book the editors explicitly address the issue of measuring
gender equality The book introduces readers to basic concepts of gender equality equity and equal opportunities then
discusses measuring these phenomena the methods of constructing indicators and reviews the main indicators that have
been proposed at the international level to measure gender equality It then sets the theoretical discussions against the
findings from a Jean Monnet project financed by the European Union to highlight the importance of a regional analysis of
gender equality in four main study areas Italy Spain France and Germany The results make it clear that it is necessary to
move from the purely national perspective hitherto used in gender equality analyses to a regional one because differences
can be highly pronounced even within the same country This is a self contained volume requiring limited statistical expertise
for the reader and is aimed at social researchers and policymakers who wish to address gender equality from a quantitative
perspective
