

11. An *internet* is an interconnection of networks. The *Internet* is the name of a specific worldwide network.
12. A *protocol* defines *what* is communicated, in *what way* and *when*. This provides accurate and timely transfer of information between different devices on a network.
13. *Standards* are needed to create and maintain an open and competitive market for manufacturers, to coordinate protocol rules, and thus guarantee compatibility of data communication technologies.

Exercises

14. *Unicode* uses 32 bits to represent a symbol or a character. We can define 2^{32} different symbols or characters.
15. With 16 bits, we can represent up to 2^{16} different colors.
16.
 - a. Cable links: $n(n-1)/2 = (6 \times 5)/2 = 15$
 - b. Number of ports: $(n-1) = 5$ ports needed per device
17.
 - a. *Mesh topology*: If one connection fails, the other connections will still be working.
 - b. *Star topology*: The other devices will still be able to send data through the hub; there will be no access to the device which has the failed connection to the hub.
 - c. *Bus Topology*: All transmission stops if the failure is in the bus. If the drop-line fails, only the corresponding device cannot operate.
 - d. *Ring Topology*: The failed connection may disable the whole network unless it is a dual ring or there is a by-pass mechanism.
18. This is a *LAN*. The Ethernet hub creates a LAN as we will see in Chapter 13.
19. Theoretically, in a *ring topology*, unplugging one station, interrupts the ring. However, most ring networks use a mechanism that bypasses the station; the ring can continue its operation.
20. In a *bus topology*, no station is in the path of the signal. Unplugging a station has no effect on the operation of the rest of the network.
21. See Figure 1.1
22. See Figure 1.2.
23.
 - a. E-mail is not an interactive application. Even if it is delivered immediately, it may stay in the mail-box of the receiver for a while. It is not sensitive to delay.
 - b. We normally do not expect a file to be copied immediately. It is not very sensitive to delay.
 - c. Surfing the Internet is the an application very sensitive to delay. We expect to get access to the site we are searching.
24. In this case, the communication is only between a caller and the callee. A dedicated line is established between them. The connection is *point-to-point*.

Hayn,G. Schreier,2017-05-12 Ineffective discharge management can jeopardize the successful completion of hospital treatment but a well managed transition from hospital care to care at home depends on the efficient exchange of information with out patient healthcare providers and professionals This is just one way in which ICT

can support healthcare and provide tools which help health professions to identify and communicate relevant data. Such tools will be increasingly important in future healthcare systems and indeed a Europe wide ICT infrastructure for information and data exchange may do much to revolutionize the quality of healthcare. It is therefore essential that infrastructures build on well established standards such as Integrating the Healthcare Enterprise (IHE) even if this initially takes longer to implement. This book presents the proceedings of the annual Health Informatics meets eHealth conference held in Vienna Austria in May 2017. The special topic chosen for eHealth2017 is Digital Insight Information Driven Health Care and the conference addressed the increasingly international focus of eHealth and the importance of cross border health ICT. The papers presented here cover many eHealth topics from maternity records to rehabilitation and from staff training to information exchange. Future ICT systems will inevitably involve machine learning and predictive analytics in order to provide actionable information to health professionals and support preventive healthcare concepts and this book provides an insight into current research in health informatics and eHealth addressing many issues central to the future of health and care. The book will be of interest to all healthcare researchers and practitioners.
