CHAPTER LEARNING OBJECTIVES

After reading this chapter, students should understand...

1. What business research is and how it differs from decision support systems and business intelligence systems.
2. The trends affecting business research and the emerging hierarchy of research-based decision makers.
3. The different types of research studies used in business.
4. The distinction between good business research and that which falls short of professional quality.
5. The nature of the research process.

KEY TERMS

Key terms are shown in **bold**, as they appear in the text, throughout the lecture notes.

DISCUSSION AND PROJECT IDEAS

- **PulsePoint**: In each chapter we highlight a statistic that was drawn from a research project. You might use this statistic to discuss a current phase of the research process or a current issue. This chapter's PulsePoint relates to hiring expectations of firms:
 - **34**...The percent of employees who never consider that their bosses, clients, or colleagues think before posting to a blog, discussion forum, or social network.

Interactive Multiobjective Decision

Making Under Uncertainty Hitoshi Yano, 2017-02-03 Recently many books on multiobjective programming have been published. However, only a few books have been published in which multiobjective programming under the randomness and the fuzziness are investigated. On the other hand, several books on multilevel programming have been published in which multiple decision makers are involved in hierarchical decision situations. In this book, we introduce the latest advances in the field of multiobjective programming and multilevel programming under uncertainty. The reader can immediately use proposed methods to solve multiobjective programming and multilevel programming which are based on linear programming or convex programming technique. Organization of each chapter is summarized as follows. In Chapter 2, multiobjective programming problems with random variables are formulated and the corresponding interactive algorithms are developed to obtain a satisfactory solution in which the fuzziness of human's subjective judgment for permission levels are considered. In Chapter 3, multiobjective programming problems with fuzzy random variables are formulated and the corresponding interactive algorithms are developed to obtain a satisfactory solution in which not only the uncertainty of fuzzy random variables but also the fuzziness of human's subjective judgment for permission levels are considered. In Chapter 4, multiobjective multilevel programming is discussed and the interactive algorithms are developed to obtain a satisfactory solution in which the hierarchical decision structure of multiple decision makers is reflected. In Chapter 5, two kinds of farm planning problems are solved by applying the proposed method in which cost coefficients of crops are expressed by random variables. *Commerce Business Daily*, 1999-11
