Seats, Votes, and the Spatial Organisation of Elections Graham Gudgin, Peter Taylor, 2024-10-31 In many elections especially those using single member constituency systems the allocation of seats is incommensurate with each party's share of the votes cast. Seats, Votes and the Spatial Organisation of Elections provides a convincing rigorous analysis of this disproportionality which has not been improved on since its publication over 30 years ago. Its formal analysis illustrated by empirical examples from a range of countries stresses the importance of three geographies as key influences on how votes are translated into seats: the geography of partisan support where people with different political persuasions cluster; the homogeneity of those clusters and their relative size. Its republication makes this classic piece of spatial political science available to contemporary audiences for whom it is as relevant as when the book first appeared in 1979. Ron Johnston's introductory essay sets the work in context and identifies its importance as the foundation for three decades of subsequent work into this key feature of electoral system operation.

Comprehensive Neonatal Nursing Care, Sixth Edition Carole Kenner, Leslie Altimier, Marina V. Boykova, 2019-08-28 Praise for the Fifth Edition: This book provides a complete look at neonatal healthcare delivery. It includes discussions of contemporary topics of interest such as informatics, genetics, global health, and family-centered care, which are vital to providers caring for neonates today. The case studies and evidence-based practice dialogues provide great opportunities for further reflection. The book is useful to a wide audience in nursing, including undergraduate and graduate nursing students practicing neonatal and pediatric nurses and advanced practice nurses who care for neonates. Score: 92/4 Stars Doody's Medical Reviews. The sixth edition of this acclaimed neonatal nursing text is completely updated to encompass the most current research findings and strategies for providing cost-effective and evidence-based care. It continues to address neonatal care from a physiologic and pathophysiologic perspective with a major emphasis on nursing management at the bedside and advanced practice level. It examines each neonatal body system and describes evidence-based interventions that assist in understanding the why behind various clinical presentations. Integrative management is threaded throughout the text along with extensive research findings to support practice strategies and rationales for sound clinical decision making. Case studies, evidence-based practice boxes, QSEN competencies, and online resources help to amplify and reinforce content. New to the Sixth Edition: New technologies including neonatal health care simulation; Trauma-Informed Care; Substantial revisions to the Neonatal Resuscitation Program; Updates in Continuous Quality Improvement; Emphasis on neuroprotective factors; Emerging global trends; Genomics and its relationship to precision health; prevention of diseases; Maternal-Fetal Units; Neonatal Abstinence Syndrome and maternal drug use; Leadership and cost management of the NICU; Updates on neonatal care protocols and procedures; new

Emerging Solutions for Future Manufacturing Systems Luis M. Camarinha-Matos,2006-01-04 Industries and particularly the manufacturing sector have been facing difficult challenges in a context of socio economic turbulence characterized by complexity as well as the speed of change in causal interconnections in the socio economic environment In order to respond to these challenges companies are forced to seek new technological and organizational solutions In this context two main characteristics emerge as key properties of a modern automation system agility and distribution Agility because systems need not only to be flexible in order to adjust to a number of a priori defined scenarios but rather must cope with unpredictability Distribution in the sense that automation and business processes are becoming distributed and supported by collaborative networks Emerging Solutions for Future Manufacturing Systems includes the papers selected for the BASYS 04 conference which was held in Vienna Austria in September 2004 and sponsored by the International
