W. Chan, 2020-12-30 This book is an introductory text on building measurement and estimating for simple buildings in Hong Kong based on the Hong Kong Standard Method of Measurement of Building Works 4th Edition Revised 2018 HKSM4 Rev 2018 It provides a toolkit for students and surveying technicians who are new to the subject This second edition updates the contents in line with the HKSM4 Rev 2018 and incorporates the latest industry developments such as BIM The main text is divided into five parts following the development of a typical project Part 1 Building the project team introduces the team setup for a typical project Part 2 Deciding the procurement strategy explains the various procurement decisions to be made by an employer before any cost estimating and measurement work takes place Part 3 Preparing for tender covers the tendering methods tender documentation and approximate estimating techniques used by Quantity Surveyors Part 4 Measuring quantities introduces measurement principles and HKSM4 Rev 2018 followed by a detailed review of the measurement methods for each major trade with worked examples Part 5 Estimating unit rates explores the basic techniques for unit rate preparation The book contains worked examples from real Hong Kong building projects self assessment questions reminders and points of note It is essential reading for Hong Kong construction and surveying students international Quantity Surveyors working in the local area and those wanting international examples of Quantity Surveyors practice Building Construction Estimating Stephen D. Schuette, Roger W. Liska, 1994 Building Construction Estimating furnishes readers with specific details on how a general building contractor derives the cost of a project before it begins and how the estimate fits into the total construction process The book provides coverage of such areas as determining labor productivity and wages selecting equipment and assigning productivity rates and costs acquiring specialty contractor prices and assigning overhead costs and profit The material is presented from the point of view of a general contractor working on a

competitively bid stipulated sum lump sum contract However other contract methods and the effects they have on the estimating process are also discussed Furthermore the principles of estimating for the specialty trades are discussed from the reference of a general building contractor and how the subcontractor s bid will affect the total project cost is presented Of special note is the book s introduction and utilization of computers in the estimating process enabling readers to utilize new technology in an effective and efficient manner The book is organized in a way that first teaches the reader to perform many of the estimating activities manually then guides them in developing a computer spreadsheet The use of spreadsheets empowers the reader to go beyond the manual calculations and develop new and more proficient solutions to estimating problems
