The conference included a full day of tutorials and several keynote talks provided by world renowned experts. The program covered high quality scientific contributions within image analysis, human and action analysis, pattern and object recognition, color imaging and quality medical and biomedical applications, face and head analysis, computer vision and multispectral color analysis. The papers were carefully selected based on at least two reviews. Among 154 submissions, 79 were accepted, leading to an acceptance rate of 51%. Since SCIA was arranged as a single track event, 30 papers were presented in the oral sessions and 49 papers were presented in the poster sessions. A separate session on multispectral color science was organized in cooperation with the 11th Symposium of Multispectral Color Science (MCS 2009).
