Shealy, 2018-10-03 The practice of shaping the irradiance profile of laser beams goes back more than three decades and the applications of beam shaping are as diverse as they are numerous. However, until Dickey and Holswade's groundbreaking and highly popular *Laser Beam Shaping Theory and Techniques* was published, there was no single detailed treatment available on the underlying theory and basic techniques of beam shaping. Building on the foundations of this previous work, these esteemed editors have teamed with recognized expert David L. Shealy to produce the first in-depth account of beam shaping applications and design. *Laser Beam Shaping Applications* details the important features of beam shaping and exposes the subtleties of the theory and techniques that are best demonstrated through proven applications. In chapters contributed by prominent active leaders in their respective specialties, the book discusses applications in lithography, laser printing, optical data storage, stable isotope separation, adaptive mirrors, and spatially dispersive lasers. The contributors share major insights, knowledge, and experience, reveal the advantages of the technologies, and include extensive references to the literature. The book concludes with a summary of beam shaping theory and techniques, as well as the history of the field. Providing practical expertise, *Laser Beam Shaping Applications* is an extremely helpful guide to improving current laser processes, optimizing application-specific technologies, and advancing future development in the field. *Scientific and Technical Books in Print*, 1972

The meeting was held jointly with the International Cryogenic Materials Conference. Jim Peeples of CVI Inc. was conference chairman. Columbus is the home of the Battelle Memorial Institute, a pioneer in cryogenic materials development, the home of CVI Inc. and Lake Shore Cryotronics Inc., two leading manufacturers of cryogenic equipment, and it is the home of Ohio State University, where research on liquid helium has long been conducted. The program consisted of 315 CEC papers, nearly the same number as for CEC 91. This was the second largest number of papers ever submitted to the CEC. Of these, 252 papers are published here in Volume 41 of *Advances in Cryogenic Engineering*. Once again, the volume is published in two books. This volume includes a number of photographs taken during the awards lunch on July 20, 1995. Photographs have often been taken during the conferences, but they have never been used. The pictures are of the awardees.
