Sound Stephen Murray:

Essays on Roberto Gerhard Monty Adkins, Michael Russ, 2017-03-07 For much of the mid twentieth century Roberto Gerhard found himself an outsider He was airbrushed from much writing on contemporary music in Spain during the Franco regime and was known in England more for his commercial music for theatre film and radio than his concert works However his significance as a musical innovator in developing serial technique and in the field of electro acoustics is now being gradually recognised in both Spain and England as well as further afield The volume explores an extensive range of Gerhard s work from the early Wind Quintet and the Spanish ballets Pandora and Don Quixote with their overt political overtones through to the late period Metamorphoses and a newly discovered chance based composition Claustrophilia written in response to a request by John Cage for his book Notations One of the key themes presented throughout the book is Gerhard s innovative use of serialism Gerhard s development of Schoenberg s technique led him to explore the serialization of both pitch and time This volume suggests evidence for the first time that situates Gerhard s idiosyncratic experiments alongside rather than after the total serialist works of his European counterparts Pierre Boulez Olivier Messiaen and Karlheinz Stockhausen

The Analysis of Gothic Architecture ,2022-12-05 The essays in this volume reflect on and build on the remarkable legacies of Robert Mark and Andrew Tallon who pioneered the application of high technology research methods to the study of Gothic architecture Combining personal reminiscences and historiographical discussions with meticulous geometrical and structural analyses based on photogrammetric and laser scanned building surveys this book offers valuable new perspectives not only on Mark and Tallon themselves but also on major churches including the abbeys of Saint Denis and Alcobá a Santa Maria Novella in Florence Notre Dame in Paris and the cathedrals of Clermont Reims and Wells Contributors are Sheila Bonde Robert Bork Lindsay S Cook Michael Davis James Hillson Kyle Killian Peter Kurmann Clark Maines Ethan Mark Stephen Murray Sergio Sanabria Dany Sandron Ellen Shortell Elizabeth B Smith Rebecca Smith Arnaud Timbert Stefaan Van Liefferinge and Nancy Wu See inside the book

Lance Comfort Brian McFarlane, 2019-01-04 In the years between 1941 and 1965 Lance Comfort made some of the most entertaining films in Britain There was the striking success of his second feature as director Hatter s Castle 1941 and when he returned to this melodramatic vein in 1945 he made a series of highly proficient and enjoyable studies in obsession including Bedelia 1946 with Margaret Lockwood as a murderess and Temptation Harbour 1947 starring Robert Newton as a decent man in the grip of erotic attraction Comfort s career has never been charted in full that is from the apprenticeship in

the 1930s through the melodramas of the 1940s to the often rewarding co features of the following two decades His is in many ways a prototypical career in British cinema his very attractive body of work has been marginalised by critical focus on a few giant figures This is a book that will appeal to all students and researchers in British cinema as well as to anyone with an interest in British films and why they were the way they were in their most productive period *The Roberto Gerhard Companion* Monty Adkins,2016-02-24 More than forty years after the composer s death the music of Roberto Gerhard 1896 1970 continues to be recorded and performed and to attract international scholarly interest The Roberto Gerhard Companion is the first full length scholarly work on this composer noted for his sharp intellect and original exploring mind This book builds on the outcomes of two recent international conferences and includes contributions by scholars from Spain the USA and UK The essays collected here explore themes and trends within Gerhard s work using individual or groups of works as case studies Among the themes presented are the way Gerhard s work was shaped by his Catalan heritage his education under Pedrell and Schoenberg and his very individual reaction to the latter s teaching and methods notably Gerhard s very distinctive approach to serialism The influence of these and other cultural and literary figures is an important underlying theme that ties essays together Exiled from Catalonia from 1939 Gerhard spent the remainder of his life in Cambridge England composing a string of often ground breaking compositions notably the symphonies and concertos composed in the 1950s and 1960s A particular focus in this book is Gerhard s electronic music He was a pioneer in this genre and the book will contain the first rigorous studies of this music as well as the first accurate catalogue of this electronic output His ground breaking output of incidental music for radio and the stage is also given detailed consideration *Feature Films on 8mm and 16mm* James L. Limbacher,1979 **Theatre World 1993-1994** John Willis,2000-02 Scenes from the plays and portraits of leading actors accompany a statistical record of the current season McLuhan in Space Richard Cavell,2002-01-01 Demonstrates how McLuhan extended insights derived from advances in physics and artistic experimentation into a theory of acoustic space which he then used to challenge the assumptions of visual space that had been produced through print culture

Loading the Silence: Australian Sound Art in the Post-Digital Age Linda Ioanna Kouvaras,2016-05-13 The

experimentalist phenomenon of noise as constituting art in much twentieth century music paradoxically reached its zenith in Cage's silent piece 4 33. But much post 1970s musical endeavour with an experimentalist telos collectively known as sound art has displayed a postmodern need to load modernism's degree zero. After contextualizing experimentalism from its inception in the early twentieth century, Dr Linda Kouvaras's *Loading the Silence: Australian Sound Art in the Post Digital Age* explores the ways in which selected sound art works demonstrate creatively how sound is embedded within local, national, gendered and historical environments. Taking Australian music as its primary but not sole focus, the book not only covers discussions of technological advancement but also engages with aesthetic standpoints through numerous interviews, theoretical developments, analysis and cultural milieux for a contemporary Australian and wider postmodern context. Developing new methodologies for synergies between musicology and cultural studies, the book uncovers a new postmodern aesthetic trajectory which Kouvaras locates as developing over the past two decades. The altermodern Australian sound art is here put firmly on the map of international debates about contemporary music, providing a standard reference and valuable resource for practitioners in the artform, music critics, scholars and educators. **John Willis' Theatre World**

John A. Willis, 1998. **The Routledge Companion to the Sound of Space**. Emma-Kate Matthews, Jane Burry, Mark Burry, 2024-11-11. This companion explores a range of conceptual and practical relationships between sound and space across various disciplines, providing insights from technical, creative, cultural, political, philosophical, psychological and physiological perspectives. The content spans a wide range of spatial typologies from large reverberant buildings to modest and intimate ones from external public squares to domestic interiors and from naturally formed environments to highly engineered spaces. These compiled insights and observations explore the vast diversity of ways in which sonic and spatial realms interact. This publication therefore forms important bridges between the intricate and diverse topics of technology, philosophy, composition, performance and spatial design to contemplate the potential of sound and space as tools for creative expression and communication as well as for technical innovation. It is hoped that by sharing these insights, this book will inspire practitioners, scholars and enthusiasts to incorporate new perspectives and methodologies into their own work. Through a rich blend of theory, practice and critical reflection, this volume serves as a valuable resource for anyone interested in exploring the intricacy of relationships between space and sound, whether they are students, professionals or simply curious. Our companion provides a cross-section through shared territories between sonic and spatial disciplines from architecture, engineering, sound design, music composition and performance, urban design, product design and much more.
