Economic Globalization: refers to the widespread, international movement of goods, capital, services, technology, and information.

- It is the increasing economic integration and interdependence of national, regional, and local economies across the world through an intensification of the cross-border movement of goods, services, technologies, and capital.

Economic globalization primarily comprises the globalization of production, finance, markets, technology, organizational regimes, institutions, corporations, and labor.

- o More trade, investment, information tech, and faster economic development
- o Benefits the rich at the expense of the poor, manufacturing job loss in developed countries, environmental damage, unethical practices of labor.

4. What are the arguments for and against globalization from country's perspective?

Answer: Globalization has resulted in a widespread sharing of ideas.

- o Advocates for globalization feel that this sharing exposes people to more cultures and ideas, making them more tolerant.
- o Opponents to globalization worry that cultures are becoming homogenized, especially in the spread of Western culture throughout the world.
