Wizards, Aliens, and Starships Charles L. Adler, 2014-02-02 A great book by itself or as a starting point for exploring the physics of space exploration as well as the classics in science fiction Robert Schaefer New York Journal of Books From teleportation and space elevators to alien contact and interstellar travel science fiction and fantasy writers have come up with some brilliant and innovative ideas Yet how plausible are these ideas for instance could Mr Weasley's flying car in the Harry Potter books really exist Which concepts might actually happen and which ones wouldn't work at all Wizards Aliens and Starships delves into the most extraordinary details in science fiction and fantasy such as time warps shape changing rocket launches and illumination by floating candle and shows readers the physics and math behind the phenomena With simple mathematical models and in most cases using no more than high school

algebra Charles Adler ranges across a plethora of remarkable imaginings from the works of Ursula K Le Guin to Star Trek and Avatar to explore what might become reality Adler explains why fantasy in the Harry Potter and Dresden Files novels cannot adhere strictly to scientific laws and when magic might make scientific sense in the muggle world He examines space travel and wonders why it isn't cheaper and more common today Adler also discusses exoplanets and how the search for alien life has shifted from radio communications to space based telescopes He concludes by investigating the future survival of humanity and other intelligent races Throughout he cites an abundance of science fiction and fantasy authors and includes concise descriptions of stories as well as an appendix on Newton's laws of motion **Mexican muralist, international**

Monuments and Memory, Made and Unmade Robert S. Nelson, Margaret Olin, 2003 How do some monuments become so socially powerful that people seek to destroy them After ignoring monuments for years why must we now

commemorate public trauma but not triumph with a monument To explore these and other questions Robert S Nelson and Margaret Olin assembled essays from leading scholars about how monuments have functioned throughout the world and how globalization has challenged Western notions of the monument Examining how monuments preserve memory these essays demonstrate how phenomena as diverse as ancient drum towers in China and ritual whale killings in the Pacific Northwest serve to represent and negotiate time Connecting that history to the present with an epilogue on the World Trade Center Monuments and Memory Made and Unmade is pertinent not only for art historians but for anyone interested in the turbulent history of monuments a history that is still very much with us today Contributors Stephen Bann Jonathan Bordo Julia Bryan Wilson Jas Elsner Tapati Guha Thakurta Robert S Nelson Margaret Olin Ruth B Phillips Mitchell Schwarzer Lillian Lan ying Tseng Richard Wittman Wu Hung **Exploring the Unknown** ,1995
