Stryker,Betty Lou Leaver,1997-09-01 This book offers concrete and practical ideas for implementing content based instruction using subject matter rather than grammar through eleven case studies of cutting edge models in a broad variety of languages academic settings and levels of proficiency The highly innovative models illustrate content based instruction programs for both commonly and less commonly taught languages Arabic Croatian French German Indonesian Italian Russian Serbian and Spanish and for proficiency levels ranging from beginners to fluent speakers They include single teacher and multi teacher contexts and such settings as typical language department classrooms specialty schools intensive language programs and university programs in foreign languages across the curriculum All of the contributors are pioneers and practitioners of content based instruction and the methods they present are based on actual classroom experiences Each describes the rationale curriculum design materials and evaluation procedures used in an actual curriculum and discusses the implications of the approach for adult language acquisition *Science Diplomacy and Neocolonialism: Lessons from the field with a view to the future* Rana Dajani ,Tania Bosqui,Rasha Bayoumi ,Abdullah Awad,2025-11-06 For the past three decades scientists and policymakers in the Global South have practiced science diplomacy under neocolonial conditions Recent crises including the COVID 19 pandemic and Russia s invasion of Ukraine have further complicated science diplomacy on public health revealing the marginalisation of actors in the Global South Yet existing models practices and modes of engagement in the Global South may subvert and strategically navigate these neocolonial conditions How can these models be collated in a dynamic and flexible way such that knowledge gained through new experiences is used iteratively across

contexts How can scientists increase multilateral interdisciplinary and transversal partnerships while navigating complex governmental and international structures For this special issue we call for papers that demonstrate innovative and flexible models for science diplomacy with a focus on public health and health promotion policies We aim to collect evidence across various aspects of public health research which demonstrates the practical role of science diplomacy in the Global South as well as the structural challenges faced on the ground While South America and Asia have received scholarly attention especially in incorporating decolonial thinking and heritage diplomacy less has been studied in the Middle East and Africa Moreover less has been done in framing science diplomacy in terms of neocolonialism in order for its root structure to be constructively challenged Areas to be covered may include but are not limited to building partnerships among stakeholders across the Global South to ensure practical implementation of public health research modes by which scientific research is grounded in local culture and context the role of stakeholders in furthering health promotion including governments the UN NGOs academia and the private sector case studies which balance the participation of researchers from the Global South with the representation of gender ethnicity and disability positioning researchers as protagonists irrespective of geographies and state hierarchies in the international system turning governments financial power in research into a force for the good rather than a tool of neocolonialism *The Publishers' Trade List Annual* ,1898 **Forthcoming Books** Rose Arny,2003
