Financial Accounting using IFRS M.H. Franco Wong, Michelle Hanlon, Robert Magee, Glenn Pfeiffer, 2025-08-14 We wrote this book to equip students with the accounting techniques and insights necessary to succeed in today's global business environment. It reflects our combined experience in teaching financial accounting to students at all levels and in several countries. For anyone who pursues a career in business, the ability to read, analyse, and interpret published financial reports is an essential skill. *Financial Accounting using IFRS* is written for future business leaders who want to understand how financial statements are prepared and how the information in published financial reports is used by investors, creditors, financial analysts, and managers. Our goal is to provide the most engaging, relevant, and accessible textbook available. **TARGET AUDIENCE** *Financial Accounting using IFRS* is intended for use in the first financial accounting course at either the undergraduate or graduate level at universities that want to teach IFRS. U.S. GAAP is not covered. This book balances the preparation of financial statements with their analysis and interpretation. This book accommodates mini courses lasting only a few days as well as extended courses lasting a full semester. *Financial Accounting using IFRS* is real world oriented and focuses on the most salient aspects of accounting. It teaches students how to read, analyse, and interpret financial accounting data to make informed business decisions. To that end, it consistently incorporates real company data both in the body of each chapter and throughout the assignment material. **Financial Accounting Theory and Analysis** Richard G.

Schroeder, Myrtle W. Clark, Jack M. Cathey, 2022-11-08 In the newly revised fourteenth edition of *Financial Accounting Theory and Analysis: Text and Cases*, a decorated team of accounting veterans delivers an authoritative exploration of how accounting standards impact the daily decisions of accounting professionals. You'll discover how accounting theory explains why particular companies select particular accounting methods and predicts the attributes of firms by analyzing the accounting methods they employ. The authors examine the latest empirical research relevant to theories of accounting and the uses of accounting information, including the fundamental analysis model, the efficient markets hypothesis, the behavioral finance model, the positive accounting theory model, and more. This latest edition robustly summarizes current disclosure requirements for various financial statement items and reviews the development and current state of accounting theory. It also includes discussions of the decline of the movement to adopt international accounting standards in the United States, coverage of the proposed IASB amendment to require reporting on ESG metrics, explorations of recent attempts to promote relevant and practical accounting research in academia, updated analysis exercises for real world financial statements, analysis of the differences between FASB and IASB accounting standards pertaining to fair value, coverage of the changes related to stock compensation contained in ASU 2021-04 and ASU 2018-07. **Intermediate Accounting IFRS,**
