Accounting Principles is the standard framework for guidelines for financial accounting used in any given jurisdiction. It includes the standards, conventions and rules that accountants follow in recording and summarising and in the preparation of financial statements. On the other hand, IFRS (International Financial Reporting Standards) is a set of international accounting standards stating how particular types of transactions and other events should be reported in financial statements. IFRS are issued by the International Accounting Standards Board (IASB). With IFRS becoming more widespread on the international scene, consistency in financial reporting has become more prevalent between global organisations. Whilst financial accounting is used to prepare accounting information for people outside the organisation or not involved in the day-to-day running of the company, management accounting provides accounting information to help managers make decisions to manage the business.

Walton, 2009. International Financial Reporting Standards (IFRS) are becoming the benchmark accounting standards for companies listed on international stock exchanges. The SEC treats them as equivalent of US Generally Accepted Accounting Principles (GAAP) and is even contemplating allowing their use instead of US GAAP. They are mandatory in Europe, Australia, and South Africa. Canada, China, Brazil, Japan, and India are planning to use them from 2011. Anybody interested in companies listed on the US stock exchanges needs to know something about them because hundreds of foreign companies are already using them to report in the US. Anybody interested in international business has to know these benchmark financial reporting rules. This book will explain the complex interrelationships between the International Accounting Standards Board (the creator of IFRS), the Financial Accounting Standards Board (FASB), and the Canadian Accounting Standards Board (AcSB), their

work programme and their plans for the future It will look at a series of central accounting issues such as revenue recognition liabilities pensions off balance sheet vehicles impairment intangible assets etc and discuss how IFRS differ from US and Canadian GAAP It will explain the organisational structure and background of the IASB and it will look at the potential impacts to financial reporting by American companies Global Financial Accounting and Reporting Peter J.
