IMPORTANT NOTE TO INSTRUCTORS

The 10th edition uses a building block approach to our coverage of consolidation in chapters 2 through 5. Chapter 2 introduces our coverage of consolidation in the most basic setting when the subsidiary is either created or purchased at an amount equal to the book value of the subsidiary's underlying net assets.

	Wholly Owned Subsidiary	Partially Owned Subsidiary	
Investment = Book Value	Chapter 2	Chapter 3	No Differential
Investment > Book Value	Chapter 4	Chapter 5	Differential
	No NCI Shareholders	NCI Shareholders	

Chapter 3 explains how the basic consolidation process changes when the parent company owns less than 100 percent of the subsidiary. Chapter 4 shows how the consolidation process differs when the parent company acquires the subsidiary for an amount greater (or less) than the book value of the subsidiary's net assets. Finally, Chapter 5 presents the most complex consolidation scenario (where the parent owns less than 100 percent of the subsidiary's outstanding voting stock and the acquisition price is not equal to the book value of the subsidiary's net assets). In order to facilitate this new approach, we emphasize that this edition includes elimination entries used in consolidation to facilitate the elimination of the investment in a subsidiary in two steps: (1) first the book value portion of the investment and income from the subsidiary are eliminated and (2) then the differential portion of the investment and income from subsidiary are eliminated with separate entries. We believe that this approach is more intuitive for students.
