Chapter 4

PROBLEM 4.1

Show that in the limit $\Delta x \rightarrow 0$, the difference equation for one-dimensional steady conduction with heat generation, Equation (4.2), is equivalent to the differential equation, Equation (2.24).

GIVEN

- One dimensional steady conduction with heat generation

SHOW

(a) In the limit of small Δx , the difference equation is equivalent to the differential equation

SOLUTION

From Equation (4.2)

$$T_{i+1} - 2T_i + T_{i-1} = -\frac{\Delta x^2}{k} \dot{q}_{G,i}$$

By definition

$$T_{i-1} = T(x - \Delta x)$$

$$T_i = T(x)$$

$$T_{i+1} = T(x + \Delta x)$$

so we can rewrite Equation (4.2) as follows

$$\frac{T(x + \Delta x) - 2T(x) + T(x - \Delta x))}{\Delta x^2} = -\frac{\dot{q}_{G,x}}{k}$$

Now, in the limit $\Delta x \rightarrow 0$, from calculus, the left hand side of the above equation becomes $\frac{d^2T}{dx^2}$ so we have

$$k \frac{d^2T}{dx^2} = -\dot{q}_{G,x}$$

which is equivalent to Equation (2.24).

Supplementary Material and Solutions Manual for Mathematical Modeling in the Environment Charles R. Hadlock,2020-05-05 This manual is meant to provide supplementary material and solutions to the exercises used in Charles Hadlock s textbook Mathematical Modeling in the Environment The manual is invaluable to users of the textbook as it contains complete solutions and often further discussion of essentially every exercise the author presents in his book This includes both the mathematical computational exercises as well as the research questions and investigations Since the exercises in the textbook are very rich in content rather than simple mechanical problems and cover a wide range most readers will not have the time to work out every one on their own Readers can thus still benefit greatly from perusing solutions to problems they have at least thought about briefly Students using this manual still need to work out solutions to research questions using their own sources and adapting them to their own geographic locations or to numerical problems using their own computational schemes so this manual will be a useful guide to students in many course contexts Enrichment material is included on the topics of some of the exercises Advice for teachers who lack previous environmental experience but who want to teach this material is also provided and makes it practical for such persons to offer a course based on these

volumes This book is the essential companion to Mathematical Modeling in the Environment **Laboratory Manual for Principles of General Chemistry** J. A. Beran, Mark Lassiter, 2022-08-16 Laboratory Manual for Principles of General Chemistry 11th Edition covers two semesters of a general chemistry laboratory program The material focuses on the lab experiences that reinforce the concepts that not all experimental conclusions are the same and depend on identifying an appropriate experimental procedure selecting the proper apparatus employing the proper techniques systematically analyzing and interpreting the data and minimizing inherent variables As a result of good data a scientific and analytical conclusion is made which may or may not be right but is certainly consistent with the data Experiments write textbooks textbooks don't write experiments A student's scientific literacy grows when experiences and observations associated with the scientific method are encountered Further experimentation provides additional cause effect observations leading to an even better understanding of the experiment The 11th edition's experiments are informative and challenging while offering a solid foundation for technique safety and experimental procedure The reporting and analysis of the data and the pre and post lab questions focus on the intuitiveness of the experiment The experiments may accompany any general chemistry textbook and are compiled at the beginning of each curricular unit An Additional Notes column is included in each experiment's Report Sheet to provide a space for recording observations and data during the experiment Continued emphasis on handling data is supported by the Data Analysis section Catalog of Copyright Entries.
