indicate the proportion of the circumference of a circle to its diameter π therefore is always in formulas equal to The most commonly used Greek letters be sides 1 are α 3 β and 1 γ Knowledge of algebra is not necessary in order to make possible the successful use of formulas for the solving of problems such as occur in the solution of triangles but a thorough understanding of the rules and processes of arithmetic is very essential The symbols or letters used in the formulas simply stand in place of the actual figures or numerical values which are inserted in the formula in each specific case according to the requirements of the problem to be solved When these values are inserted the result required may be obtained by simple arithmetical processes About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
