Vitruvius, 2014-08-07 This Is A New Release Of The Original 1914 Edition Ten Books on Architecture, 2001 Vitruvius
Vitruvius, Morris Hicky Morgan, 2022-07-27 2022 Reprint of the 1914 Edition Includes illustrations Exact facsimile of the
original edition and not reproduced with Optical Recognition Software Translated by Morris Hicky Morgan with illustrations
and original designs prepared under the direction of Herbert Langford Warren Marcus Vitruvius Pollio a Roman architect
and engineer flourishing in the first century B C was the author of the oldest and most influential work on architecture in
existence For hundreds of years the specific instructions he gave in his Ten Books on Architecture were followed faithfully
and major buildings in all parts of the world reveal the widespread influence of his precepts According to the Encyclopedia
Britannica he was the chief authority studied by architects and in every point his precepts were accepted as final Bramante
Michelangelo Palladio Vignola and earlier were careful students of the work of Vitruvius His book is thus one of those rare
works that have been supremely important in the creation of the greatest art masterpieces Vitruvius describes the classic
principles of symmetry harmony and proportion in architecture the design of the treasury prison senate house baths forum
and temples the construction of the theater its site foundations and acoustics the proper style and proportion for private
dwellings the differences between the Ionic Doric and Corinthian styles methods of giving durability and beauty to polished
finishings and many other topics It is a direct authoritative and detailed introduction to the ancients methods of construction
the materials of the architect and the prevailing aesthetic beliefs of the times but it is also a work of art Vitruvius wrote in
such a fascinating manner and digressed from his subject so often as for instance when he wrote about the winds Archimedes
in his bath and why authors should receive awards and honors at least as often as athletes that his book has had a continuing
appeal to the general reader for many centuries Besides being an instructive treatise on nearly everything connected with
Roman and Greek architecture it is an entertaining description of some aspects of the life and beliefs of the times This edition
is the standard English translation prepared over a period of several years by Professor M H Morgan of Harvard University
