

Body Fat Analyzer and Scale

Leading the Way in Accuracy®

Thank you for purchasing a Taylor® Precision Product. Your Taylor® Body Fat Analyzer and Scale is an example of superior design and craftsmanship. Please read this instruction manual carefully before use. Keep these instructions handy for future reference.

INTRODUCTION

How Taylor's Body Fat Analyzer and Scale Works:

This instrument uses BIA (Bioelectrical Impedance Analysis). BIA is one of the most accurate methods of measuring body fat. It simply sends a harmless signal through the fat and muscle in your body. This method calculates both your personal weight and body fat simultaneously, thus giving you a more accurate reading of your overall health and fitness.

NOTE: This instrument is a personal monitor and should be used in a consistent manner for the most accurate reading. While readings might vary between this analyzer and other methods of measurement (hydrodensitometry or hand held calipers), your changes in body fat percentage shown by this instrument will be reflected accurately.

While this analyzer will work accurately as a scale for anyone and give accurate body fat readings for a majority of people, it is not intended for use by pregnant women or children under the age of 18. (See Caution)

Rehabilitation Psychology Anthony J. Goreczny, 2013-11-11 Despite medical technological advances the major killers with which we must currently contend have remained essentially the same for the past few decades Stroke cancer and heart disease together account for the vast majority of deaths in the United States In addition due to improved medical care many Americans who would previously have died now survive these disorders necessitating that they receive appropriate rehabilitation efforts One result of our own medical advances is that we must now accept the high costs associated with providing quality care to individuals who develop one of these problems and we must avail ourselves to assist afflicted individuals families Despite the relative stability of causes of death and disability the health care field is currently

experiencing tremendous pressures both from professionals with in the field who desire more and better technology than is currently available and from the public and other payers of health care e g insurance companies who seek an end to increasing health care costs These pressures along with an increased emphasis on providing evidence of cost effectiveness and quality assurance are substantially changing the way that health care professionals perform their jobs

Bipolar II Disorder Gordon Parker, 2019-01-03 The lifetime risk of developing bipolar II disorder is 5-7% yet the condition is often poorly detected Mood elevation states are less extreme than in bipolar I disorder although the depressive episodes are usually severe When correctly treated the outcome is positive but bipolar II is often poorly managed resulting in a high suicide rate This is the only academic and clinical management review focused entirely on bipolar II scrutinizing history epidemiology burden and neurobiology and including an extensive clinical debate by international experts about effective management strategies Now in its third edition this book features new chapters on the limitations to clinical treatment trials and perinatal management nuances In a completely new section international experts offer their personal responses and distinctive wisdom to key management issues and allow the reader to observe a variety of opinions
