

Woodcock Reading Mastery Tests-Revised and Test of Early Reading Ability, Third Edition

 Exclusively available on IvyPanda

Introduction

Basically, assessment is usually confused with and equated to evaluation. However, these binary concepts are apparently very different. As it emanates, assessment could be used in determining what a particular student can do or knows. In fact, assessment data tend to influence students grades, advancements and placements along with the instructional curriculum and strategies.

As an imperative education element therefore, assessment could be used when informing instruction (Wren, 2004). The initial student reading capability assessment requires that a noble reading instruction be implemented.

At the moment, various classroom students seem to possess assorted literacy skills and backgrounds. Such features make it indispensable for educators or instructors to have well designed assessment instruments and instruction tools to aid in the provision of suitable curriculum to students.

Based on these, the paper purposely aims at comparing and contrasting the renowned binary assessment instruments namely Woodcock Reading Mastery Tests-Revised (WRMT-T) and Test of Early Reading Ability, Third Edition (TERA-3) which measure the students reading skills. The strengths and weaknesses as well as the reliability and validity of data collection methods of these assessment instruments will be measured.

Thesis Statement

Despite the fact that both TERA-3 and WRMT-R are perceived to be of great significance in assessments, the strengths and limitations can suggest that TERA-3 is superior as compared to WRMT-R.
