A Republic of Equals Jonathan Rothwell, 2021-09-14 In this provocative book economist Jonathan Rothwell draws on the latest empirical evidence from across the social sciences to demonstrate how rich democracies have allowed racial politics and the interests of those at the top to subordinate justice He looks at the rise of nationalism in Europe and the United States revealing how this trend overlaps with racial prejudice and is related to mounting frustration with a political status quo that thrives on income inequality and inefficient markets But economic differences are by no means inevitable Differences in group status by race and ethnicity are dynamic and have reversed themselves across continents and within countries Inequalities persist between races in the United States because Black Americans are denied equal access to markets and
