Mittelman,2020-08-04 Why the paradigm of the world class university is an implausible dream for most institutions of higher education Universities have become major actors on the global stage Yet as they strive to be world class institutions of higher education are shifting away from their core missions of cultivating democratic citizenship fostering critical thinking and safeguarding academic freedom In the contest to raise their national and global profiles universities are embracing a new form of utilitarianism one that favors market power over academic values In this book James Mittelman explains why the world class university is an implausible dream for most institutions and proposes viable alternatives that can help universities thrive in today s competitive global environment Mittelman traces how the scale reach and impact of higher education institutions expanded exponentially in the post World War II era and how the market led educational model became widespread Drawing on his own groundbreaking fieldwork he offers three case studies the United States which exemplifies market oriented educational globalization Finland representative of the strong public sphere and Uganda a postcolonial country with a historically public but now increasingly private university system Mittelman shows that the world class paradigm is untenable for all but a small group of wealthy research intensive universities primarily in the global North Nevertheless institutions without substantial material resources and in far different contexts continue to aspire to world class stature An urgent wake up call Implausible Dream argues that universities are repurposing at the peril of their high principles and recommends structural reforms that are more practical than the unrealistic worldwide measures of excellence prevalent today **The Times Index** ,2006 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement
