Olson, 2004 Olson contends that attention to the visual images created in each of these roles dramatizes fundamental changes in Franklin's sensibility concerning British America In 1754 Franklin was an American Whig supporter of the British Empire's constitutional monarchy During the late 1750s and early 1760s he veered toward increasing the power of the Crown over Pennsylvania by changing the colony's form of government before ultimately rejecting constitutional monarchy and advocating republican politics during the 1770s and 1780s The shifts in Franklin's fundamental political commitments are among the most arresting aspects of his life Benjamin Franklin's Vision of American Community highlights these changes as it examines his pictorial representations of British America through several decades

Threlkeld,2022-05-10 Between 1900 and 1950 many internationalist U S women referred to themselves as citizens of the world This book argues that the phrase was not simply a rhetorical flourish it represented a demand to participate in shaping the global polity and an expression of women s obligation to work for peace and equality The nine women profiled here invoked world citizenship as they promoted world government a permanent machinery to end war whether in the form of the League of Nations the United Nations or a full fledged world federation These women agreed neither on the best form for such a government nor on the best means to achieve it and they had different definitions of peace and different levels of commitment to genuine equality But they all saw themselves as part of a global effort to end war that required their participation in the international body politic Excluded from full national citizenship they saw in the world polity opportunities for engagement and equality as well as for peace Claiming world citizenship empowered them on the world stage It gave them a language with which to advocate for international cooperation *Citizens of the World* not only provides a more complete understanding of the kind of world these women envisioned and the ways in which they claimed membership in the global community It also draws attention to the ways in which they were excluded from international institution building and to the critiques many of them leveled at those institutions Women s arguments for world government and their practices of world citizenship represented an alternative reaction to the crises of the first half of the twentieth century one predicated on cooperation and equality rather than competition and force **Essentials of Pediatric Nursing** Terri
