Leading Through Kim B. Clark, Jonathan R. Clark, Erin E. Clark, 2024-09-17 Generative AI and the remote work revolution show us every day that we're in a new era. The rules and norms have changed, and so must leadership. And yet, coercive bureaucracy, hierarchy, and control—old ways of thinking and working—are still with us, a deep-seated and powerful legacy. We are living through a profound transition from an old industrial era to a new one that is digital, transparent, and complex. In this important new book by former dean of Harvard Business School Kim Clark, written with his business school professor son Jonathan and management consultant daughter Erin, the dynamic struggle between two competing paradigms of leadership is compellingly illustrated: an old paradigm that involves control and power over people versus a new one that enables and inspires power through people. With rich examples and stories, the authors show how deeply ingrained the legacy model of leadership remains and how destructive it is, causing waste and loss of human potential, stifling innovation, and ultimately resulting in what the authors call organizational darkness. They go on to articulate a new positive model, one that consciously seeks to do good and to make things better, that cares for people, helping them to thrive, and that mobilizes people to solve tough problems. These three elements, they argue, are the soul, heart, and mind of leadership, and activating them requires careful attention to both the personal and the organizational dimensions of leadership. The narrative is interwoven with probing analysis and reflection, and the authors speak clearly and frankly about the moral aspects and

impact of leadership They also provide a concrete frame and approach for scaling the new model and creating a vibrant leadership system Leading Through is a deep and essential account of the evolution of our leadership thinking and practice that is both timely and timeless Data-Driven Talent Management Kristin Saling,2024-08-03 How can I use insights from people data to develop an inclusive engaged high performing workforce What data is available and how do I collect it ethically Data Driven Talent Management is a practical guide for HR professionals which answers these questions It outlines effective data collection and analysis methods as well as showing how to develop metrics and key performance indicators to support employee experience It also provides guidance on how to build a comprehensive talent database by understanding different employee experiences attributes skills and journeys In addition there is also essential advice on how to leverage data to improve motivation and employee engagement use data to assess different thought and work styles in the workforce and use the results to build a diverse and inclusive organization that allows all employees and the business to thrive Full of tools tips and frameworks and written by a professional who is implementing a data driven approach to talent management for the US Army the world s largest employer this is essential reading for all mid level and senior HR practitioners
