Computational Methods in Nonlinear Structural and Solid Mechanics Ahmed K. Noor, Harvey G. McComb, 2014-05-20  
Computational Methods in Nonlinear Structural and Solid Mechanics covers the proceedings of the Symposium on Computational Methods in Nonlinear Structural and Solid Mechanics. The book covers the development of efficient discretization approaches, advanced numerical methods, improved programming techniques, and applications of these developments to nonlinear analysis of structures and solids. The chapters of the text are organized into 10 parts according to the issue they tackle. The first part deals with nonlinear mathematical theories and formulation aspects, while the second part covers computational strategies for nonlinear programs. Part 3 deals with time integration and numerical solution of nonlinear algebraic equations, while Part 4 discusses material characterization and nonlinear fracture mechanics, and Part 5 tackles nonlinear interaction problems. The sixth part discusses seismic response and nonlinear analysis of concrete structure, and the seventh part tackles nonlinear problems for nuclear reactors. Part 8 covers crash dynamics and impact problems, while Part 9 deals with nonlinear problems of fibrous composites and advanced nonlinear applications. The last part discusses computerized symbolic manipulation and nonlinear analysis software systems. The book will be of great interest to numerical analysts, computer scientists, structural engineers, and other professionals concerned with nonlinear structural and solid mechanics.

Rohsenow, 2003-02-28. This Chinese-English dictionary of proverbs (yanyu) consists of approximately 4,000 Chinese proverbs alphabetically arranged by the first word (s) of the proverb according to the Hanyu Pinyin transcription and Chinese characters (standard simplified) followed by a literal and, when necessary, also a figurative English translation. Additional data such as brief usage notes, sources, parallel expressions, cross references, and famous instances of use are provided where available. The proverbs are supplemented by an index of key words, both Chinese and English, found in all entries and of all topics addressed. The author has provided a scholarly introduction analyzing the definition, structure, usage, and history of these yanyu in traditional and contemporary China, as well as a bibliography of collections and relevant scholarly studies of yanyu. This work is the first such scholarly collection to appear since the Reverend Scarborough's 1926 collection, which will be of use not only to sinologists in a wide variety of fields including anthropology, literature, sociology, psychology, and history, but also to non-Chinese readers interested in Chinese culture or comparative ethnolinguistic and paremiological research.
