Classification Key for Whales

To identify the whales shown below, use the dichotomous key which consists of a series of paired statements. To identify a whale, decide which statement in the first pair describes that whale. Go to the pair of statements indicated by the number following your choice. Again, decide which statement describes the whale. If the statement is followed by the name of the whale, you have identified the whale. If the statement is followed by a number, go to that pair of statements to make another choice. Continue the process until you have identified the whale. Using the key, all of the whales can be identified.
