Valkyrie Manual Gear:

Valkyrie: the North American XB-70 Graham M. Simons, 2014-08-19 A fascinating insight into one of the Cold War's most interesting concept aircraft with new information photographs and first hand accounts Flypast During the 1950s plans were being drawn at North American Aviation in Southern California for an incredible Mach 3 strategic bomber The concept was born as a result of General Curtis LeMay's desire for a heavy bomber with the weapon load and range of the subsonic B 52 and a top speed in excess of the supersonic medium bomber the B 58 Hustler However in April 1961 Defense Secretary McNamara stopped the production go ahead for the B 70 because of rapid cost escalation and the USSR's newfound ability to destroy aircraft at extremely high altitude using either missiles or the new Mig 25 fighter Nevertheless in 1963 plans for the production of three high speed research aircraft were approved and construction proceeded In September 1964 the first Valkyrie now re-coded A V 1 took to the air for the first time and in October went supersonic This book is the most detailed description of the design engineering and research that went into this astounding aircraft It is full of unpublished details photographs and firsthand accounts from those closely associated with the project Although never put into full production this giant six engined aircraft became famous for its breakthrough technology and the spectacular images captured on a fatal air to air photo shoot when an observing Starfighter collided with Valkyrie A V 2 which crashed into the Mojave Desert Well illustrated with numerous diagrams and black and white photographs the book provides an interesting insight into one of the so called white elephant projects of the 1960s Jets Monthly

North American XB-70 Valkyrie Peter E. Davies, 2018-03-09 Of the many futuristic military aircraft concepts created in the 1950s the North American XB 70 still stands out as the most awe inspiring With its huge white partially folding delta wing its fuselage resembling a striking cobra and its extraordinary performance it was one of the foremost technological achievements of the 20th Century A strategic bomber built to outrun any Soviet fighter jet it could reach Mach 3 with a full nuclear payload as fast as the legendary SR 71 Blackbird but more than three times the size However its role as a nuclear bomber was limited after the introduction of Intercontinental Ballistic Missiles and defence cuts eventually led to the project being scrapped in the mid 1960s The Valkyrie had a brief costly decade of life but it proved the continuing value of developing manned bombers However almost half a century after the XB 70 its predecessor the B 52 continues in service Using full colour artwork and rigorous analysis this is the complete story of the ultimate US Cold War military X plane
