Prag, 2003-10-01

Valuation Richard Hayward, 2014-06-03 The sixth edition of Valuation Principles into Practice continues to be both a core text for all students undertaking surveying qualifications and a handy reference guide for valuers in practice The new edition has been thoroughly updated with nine completely re written chapters The book provides extensive details of valuation principles and practices in agricultural commercial residential industrial and leisure sectors The balance of academic and practicing contributors explore the law and regulation within the field of valuation and include chapters on valuations for financial investments taxation and rating insurance as well as useful case studies and detailed approaches to valuation procedures for a variety of properties from farms to public houses With extensive market knowledge and the obvious benefit of his involvement with the five previous editions Richard Hayward brings the sixth edition well into the twenty first century The book continues its tried and tested melding of town and gown and the twenty six contributors to the twenty three chapters are all leading specialists in their fields *Researching Human Geography* Anna Davies, Keith

Hoggart, Loretta Lees, 2014-04-04 Researching Human Geography is an essential new text for any geography student about to embark on a research project An understanding of how different theories of knowledge have influenced research methodologies is crucial in planning and designing effective research this book makes this link clear and explores how various philosophical positions from positivism to post structuralism have become associated with particular methodologies The book gives an overview of a wide range of methods and data collection both quantitative and qualitative and explores their strengths and weaknesses for different kinds of research Researching Human Geography also looks at the various techniques available for the analysis of data which is presented as an integral and ongoing part of the research process Clearly written with extensive use of examples from previous research to show methodology in action this new text is an invaluable addition to both the theory and method of research in human geography **Greenfields, Brownfields and Housing Development** David Adams, Craig Watkins, 2008-04-15 The location of new housing development has become one of the most intractable controversies of modern times This book provides a powerful critique of the growing tendency to reduce the debate on the development of new housing to a mere choice between greenfield and brownfield locations It calls for full account to be taken of such factors as the structure and organisation of the housebuilding industry supply and demand pressures in the housing market the contested nature of sustainability and the political character of the planning process if a truly effective housing land policy is to be devised Drawing on theories from economics and political science this book will provide an important reference point on the institutional context within which residential development takes place and on the concerns of planning authorities environmentalists housebuilders and their customers in relation to the apparent choice between greenfield and brownfield development Housing Statistics 2004 Great Britain: Office of the Deputy Prime Minister, Great Britain: ODPM, 2004-12-09 Housing Statistics 2004 **Shaping Places** David Adams, Steven Tiesdell, 2013 Shaping Places explains how towns and cities can turn real estate development to their advantage to create the kind of places where people want to live work relax and invest It contends that the production of quality places which enhance economic prosperity social cohesion and environmental sustainability require a transformation of market outcomes The core of the book explores why this is essential and how it can be delivered by linking a clear vision for the future with the necessary means to achieve it Crucially the book argues that public authorities should seek to shape regulate and stimulate real estate development so that developers landowners and funders see real benefit in creating better places Key to this is seeing planners as market actors whose potential to shape the built environment depends on their capacity to understand and transform the embedded attitudes and practices of other market actors This requires planners to be skilled in understanding the political economy of real estate development and successful in changing its outcomes through smart intervention Drawing on a strong theoretical framework the book reveals how the future of places will come to be shaped through constant interaction between State and market power Filled with international examples essential case studies color

diagrams and photographs this is essential reading for undergraduate and graduate students taking planning property real estate or urban design courses as well as for social science students more widely who wish to know how the shaping of place really occurs

Housing Markets in the United States and Japan Yukio Noguchi, James M. Poterba, 2007-12-01 Although Japan and the United States are the world's leading economies, there are significant differences in the ways their wealth is translated into living standards. A careful comparison of housing markets illustrates not only how living standards in the two countries differ but also reveals much about saving patterns and how they affect wealth accumulation. In this volume, ten essays discuss the evolution of housing prices, housing markets, and personal savings, housing finance, commuting, and the impact of public policy on housing markets. The studies reveal surprising differences in housing investment in the two countries. For example, because down payments in Japan are much higher than in the United States, Japanese tend to delay home purchases relative to their American counterparts. In the United States, the advent of home equity credit may have reduced private saving overall. This book is the first comparison of housing markets in Japan and the United States, and its findings illuminate the effects of housing markets on productivity, growth, business investment, and trade.

Private Property, Community Development, and Eminent Domain Robin Paul Malloy, 2016-04-15 The contributors in this volume address the fundamental relationship between the state and its citizens and among the people themselves. Discussion centers on a recent decision by the United States Supreme Court in the case of *Kelo v. City of New London*. This case involved the use of eminent domain power to acquire private property for purposes of transferring it by the State to another private party that would make better economic use of the land. This type of state action has been identified as an economic development taking. In the *Kelo* case, the Court held that the action was legal within provisions of the US Constitution, but the opinion was contentious among some of the Justices and has been met with significant negative outcry from the public. The *Kelo* case and the public debate arising in its aftermath give cause to assess the legal landscape related to the ability of government to fairly balance the tension between private property and the public interest. The tension and the need to successfully strike a balance are not unique to any one country or any one political system. From the United States to the United Kingdom to the People's Republic of China, property and its legal regulation are of prime importance to matters of economic development and civic institution building. The *Kelo* decision therefore explores a rich set of legal principles with broad applicability.

The Garden City Stephen Victor Ward, 1992 A critical and scholarly examination of the origins, implementation, international transference, and adaptation of the garden city idea and a consideration of its continuing relevance in the late 20th and 21st centuries.

Food Waste Reduction and Valorisation Piergiuseppe Morone, Franka Papendiek, Valentina Elena Tartiu, 2017-04-26 This book adds a new dimension to the sustainability assessment of food waste reduction and valorisation policy analysis. Featuring a transdisciplinary analysis by key experts in

the field it identifies the drivers of change in food waste reduction and valorisation technologies by looking for example at the regulatory framework and at policy actions undertaken by local and global actors The book explores the development of regulations and policies for food waste prevention management and valorisation at a global as well as European Union level It also discusses the notion of food waste in legal terms and investigates the effects of the lack of a standard universal definition of food waste on the efficient use of by products promising processes and products for technological and commercial exploitation Utilising mathematical mapping methods to assess food consumption impacts and providing supply chain models that allow the testing of consumption scenarios the book goes on to discuss a series of emerging technologies tested at lab scale and or pilot scale and opportunities for the valorisation of food waste
