Nineteenth-Century Fiction and the Production of Bloomsbury Matthew Ingleby, 2018-11-05 This study explores the role of fiction in the social production of the West Central district of London in the nineteenth century It tells a new history of the novel from a local geographical perspective tracing developments in the form as it engaged with Bloomsbury in the period it emerged as the city's dominant literary zone A neighbourhood that was subject simultaneously to socio economic decline and cultural ascent fiction set in Bloomsbury is shown to have reconceived the area's marginality as

potential autonomy Drawing on sociological theory this book critically historicizes Bloomsbury s trajectory to show that its association with the intellectual fraction known as the Bloomsbury Group at the beginning of the twentieth century was symptomatic rather than exceptional From the 1820s onwards writers positioned themselves socially within the metropolitan geography they projected through their fiction As Bloomsbury became increasingly identified with the cultural capital of writers rather than the economic capital of established wealth writers subtly affiliated themselves with the area and the figure of the writer and Bloomsbury became symbolically conflated **The Novel Magazine** ,1906 *The Reality of the Unreal* Judit Borbély,2005 In the nineteenth century the great cities underwent the most conspicuous transformation The beauties and the dark side of urban existence soon came to be one of the central issues in contemporary literature and art In *The Reality of the Unreal* the works of four great English writers of the time are analyzed with the focus on their representation of the city Through the concrete image of London and Paris around the turn of the century as well as through the metaphorical role of the city as a concept this book a new volume in the Philosophiae Doctores series provides differing views about the age as seen by H G Wells George Gissing Joseph Conrad and Henry James The books analysis arrives at the complex image of civilization at the end of the nineteenth century *Pompeii in the Public Imagination from Its Rediscovery to Today* Shelley Hales, Joanna Paul,2011-11-17 A collection of essays exploring the different ways in which the ruined city of Pompeii has been a major source of inspiration to Western imaginations Creative and popular as well as scholarly approaches are covered including an interview with the novelist Robert Harris and the volume is fully illustrated with several images in full colour *The Black Sea Of Roses: A Novel {The Antique Shop, Book 2}* Vanessa M. Chattman,2021-04-30 The antique shop is a historical landmark discovered by Tom Mark and Melinda in the small town of Greenville Valley in upstate New York tormented by demonic historical paintings possessed porcelain dolls and wicked ancient artifacts The Whitfield s owned the antique shop in the early 1800 s and lived in The Shadow Heart Castle Mansion estate which was built on desolate American civil war battle grounds located in upstate New York with dimensions of American civil war soldiers apparitions their ownership of the antique shop lasted until the late 1950 s and supernatural events continued to haunt the newly restored two story brick building The old couple s bodies were never found and the antique shop was abandoned for many years [The Oxford Handbook of the Eighteenth-Century Novel](#) J.
