Public Procurement and the EU Competition Rules Albert Sánchez Graells, 2011-01-29 Shortlisted for the 2012 Prix Vogel in Economic Law Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This new work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market In this process of convergence between competition and public procurement law the need for this joint study is clearly apparent As such the book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is particularly significant The book moves away from the classical focus of public procurement on the activities of private actors developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective The analysis is both legal and economic Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public procurement

Liberalisation of Natural Gas Markets Onur Demir, 2020-03-21 This book investigates the overall natural gas reform performance of Turkey addressing both shortfalls and setbacks that have prevented Turkey from the fulfillment of the regulatory implementation since 2001 and how the prospectively liberalised natural gas market can effectively operate at all levels Although eighteen years have passed since the introduction of the first legislation as a basis for a more liberalised Turkish natural gas market the completion of the reform process still suffers from a lack of enforcement The book offers recommendations to address this the main one being that policy makers should give due consideration to the consolidation of EMRA's independent role with appropriate safeguards laid out to

prevent attempts of regulatory misuse The book concludes by suggesting that there is a compelling need to move forward with a consolidated reform sooner rather than later if Turkey genuinely wishes to take a leadership position in the race to become an efficient gas hub and be part of Europe's single energy market
