
Understanding Meats
and Game

Meats are such a large area of study that we have divided the subject matter into two chapters. This first chapter concentrates on basic product information. In particular, it discusses the general characteristics of the four most important meats—beef, lamb, veal, and pork. The great variety of meat cuts may be somewhat confusing at first, so careful review is called for. After studying Chapter 10, you should be able to:

1. Describe the composition and structure of meat and explain how they relate to meat selection and cooking methods.
2. Explain the use of the federal meat inspection and grading system in selecting and purchasing meats.
3. Explain the effect that aging has on meat and identify the two primary aging methods.
4. Identify the primal cuts of beef, lamb, veal, and pork, and list the major fabricated cuts obtained from each of them.
5. Select appropriate cooking methods for the most important meat cuts, based on the meat's tenderness and other characteristics.
6. Prepare variety meats.
7. Identify the characteristics of game meats and select the appropriate cooking methods for them.
8. Determine doneness in cooked meats.
9. Store fresh meats and frozen meat to gain the maximum shelf life.

A. Terms

Fill in each blank with the term that is defined or described.
