Abstract

Abstract: This study examined the relationship between the use of the Internet and the use of other information sources. The study was conducted in a sample of 1000 Internet users. The results showed that the use of the Internet was positively related to the use of other information sources. The study also found that the use of the Internet was related to the use of other information sources in a non-linear fashion. The study has implications for the use of the Internet in the future.
