Innovation Nation John Kao, 2007-10-02 Not long ago Americans could rightfully feel confident in our preeminence in the world economy The United States set the pace as the world's leading innovator from the personal computer to the internet from Wall Street to Hollywood from the decoding of the genome to the emergence of Web 2.0 we led the way and the future was ours So how is it bestselling author and leading expert on innovation John Kao asks that today Finland is the world's most competitive economy That U.S. students rank twenty fourth in the world in math literacy and twenty sixth in problem solving ability That in 2005 and 2006 combined in a reverse brain drain 30,000 highly trained professionals left the United States to return to their native India Even as the United States has lost standing in the world community because of the war in Iraq Kao warns the country is losing its edge in economic leadership as well The future of our prosperity and of our national security is at serious risk But it doesn't have to be this way Based on his in depth experience advising many of the world's leading companies and studying cutting edge innovation best practices in the most dynamic hot spots of innovation both in the United States and around the world Kao argues that the United States still has the capability not only to regain our competitive edge but to take a bold step out ahead of the global community and secure a leadership role in the twenty

first century We must though take serious and concerted action fast First offering a stunning troubling portrait of just how serious is the erosion in recent years of U S competitiveness in innovation Kao then takes readers on a fascinating tour of the leading innovation centers such as those in Singapore Denmark and Finland which are trumping us in their more focused and creative approaches to fueling innovation He then lays out a groundbreaking plan for a national innovation strategy that would empower the United States to actually innovate the process of innovation to marshal our vast resources of talent and infrastructure in the particular ways that his studies of innovation have shown lead to transformative results Innovation Nation is vital reading for all those Americans who are troubled by the great challenges the United States faces in the ever more competitive economy of our twenty first century world
